Add a guide to the Knowledge Base

4 steps · about 3 min

Write or import reference guides for a department, with images and videos.

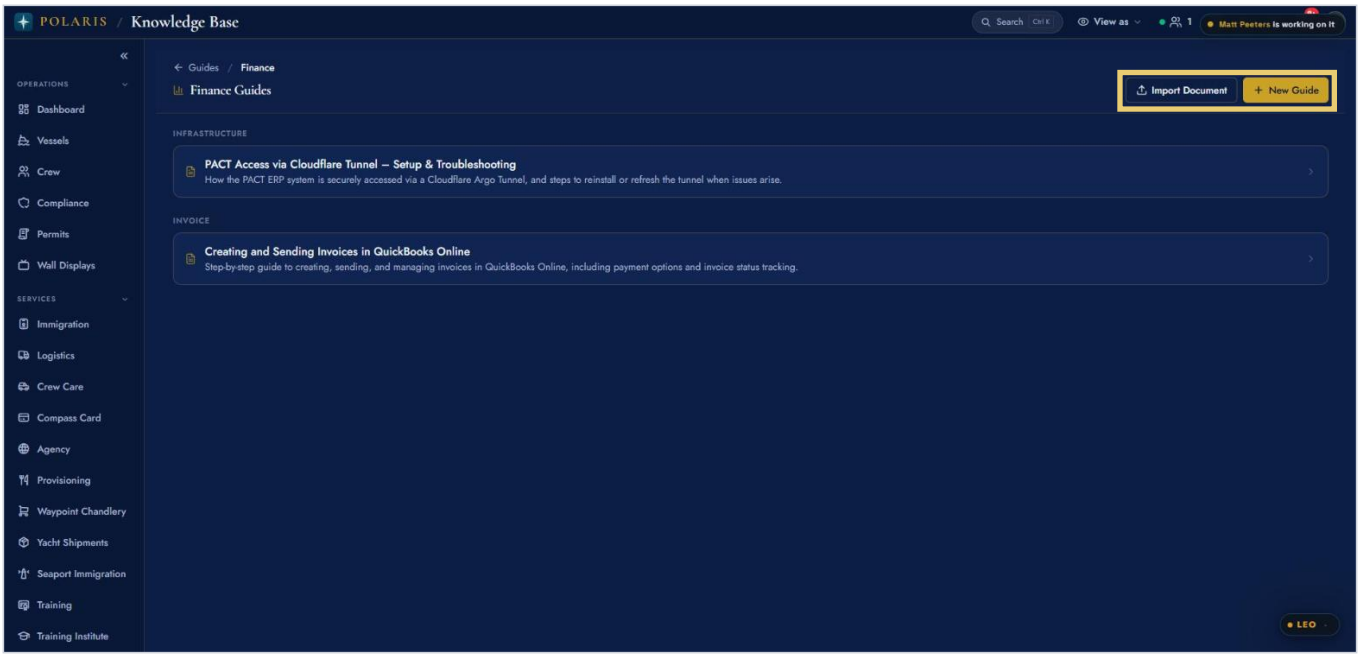

1 Choose the department

Click **Knowledge Base**. Pick the department the guide belongs to — Crew & Immigration, Yacht IT Solutions, Finance, Operations and so on. Each card shows how many guides it has.

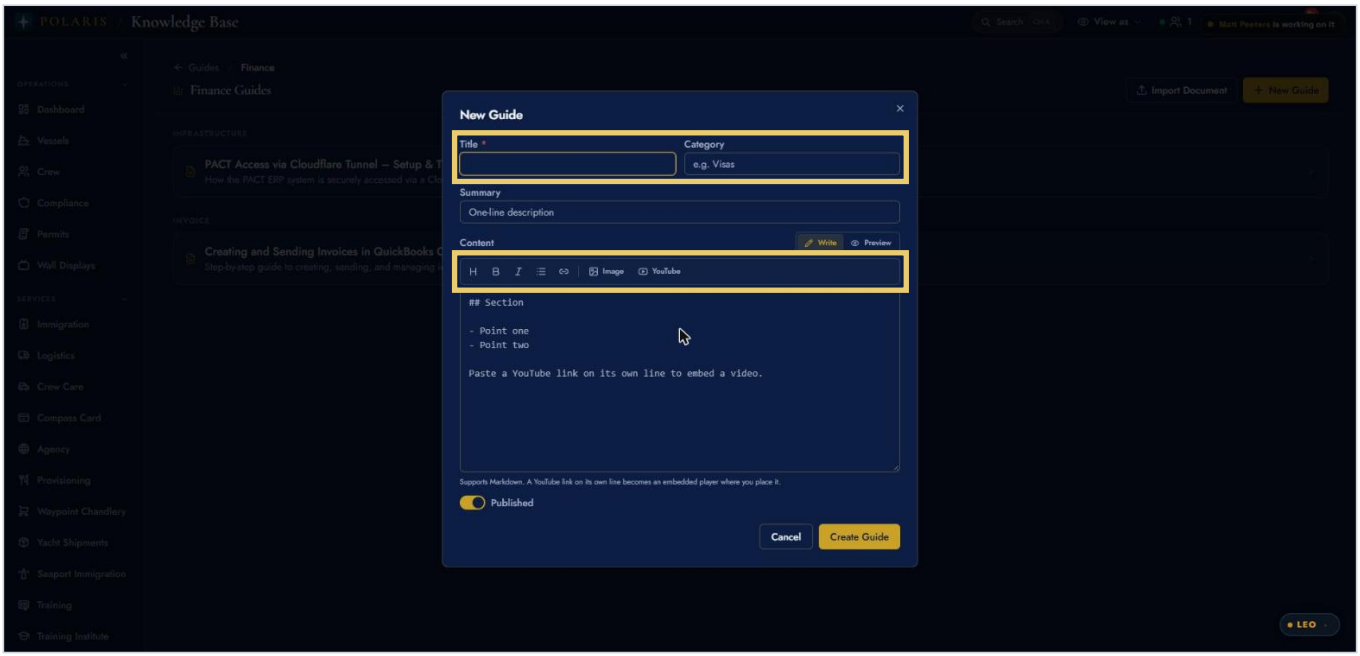

2 Click New Guide

Click **New Guide**. To turn an existing PDF or Word document into a guide instead, click **Import Document**, choose the file and click **Import & Create** — the text is extracted for you.

3 Write the guide

Enter a **Title** (required), a **Category** (guides are grouped by it) and a one-line **Summary**. Write the **Content** using the toolbar for headings, bold, lists and links; **Image** adds a picture and **YouTube** embeds a video. **Preview** shows how it will look.

4 Publish

Leave **Published** on for everyone to see it, or switch it off to keep it as a draft. Click **Create Guide**. Open a guide later to **Edit** it or download a **Branded PDF**.
