Use the How-to Guides

3 steps · about 1 min

Get step-by-step help for the page you're on, and download any guide as a PDF.

1 Help for the page you're on

On any page, click the **?** button in the top bar (or press **?** on your keyboard). A panel opens with the guides for that page — click one to read it right there.

2 Browse every guide

Click **Browse all how-to guides** at the bottom of the panel, or **Resources -> How-to Guides**. Guides are grouped by sidebar section; search finds any word in any step.

3 Download as PDF

Each guide has **Download PDF**. Each section has a button to download all its guides as one PDF — handy for training a new starter.

> **Tip:** Click any screenshot to enlarge it. The gold boxes show where to click.

Add a guide to the Knowledge Base

4 steps · about 3 min

Write or import reference guides for a department, with images and videos.

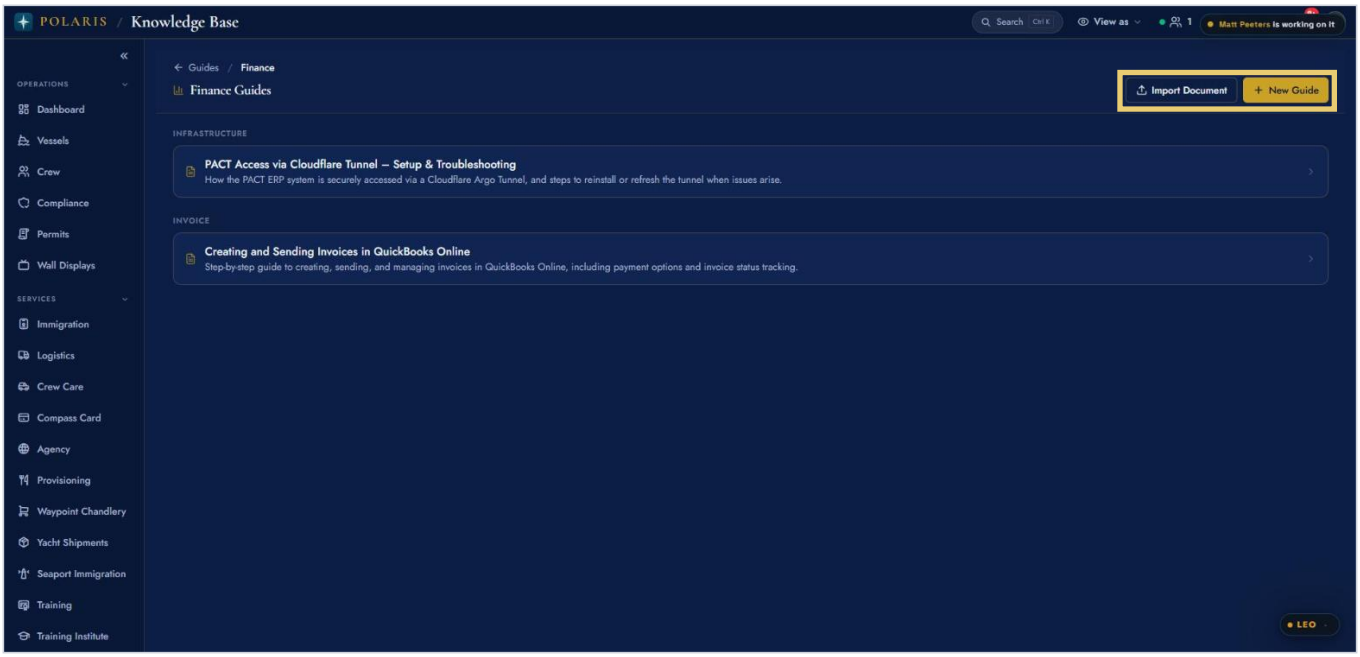

1 Choose the department

Click **Knowledge Base**. Pick the department the guide belongs to — Crew & Immigration, Yacht IT Solutions, Finance, Operations and so on. Each card shows how many guides it has.

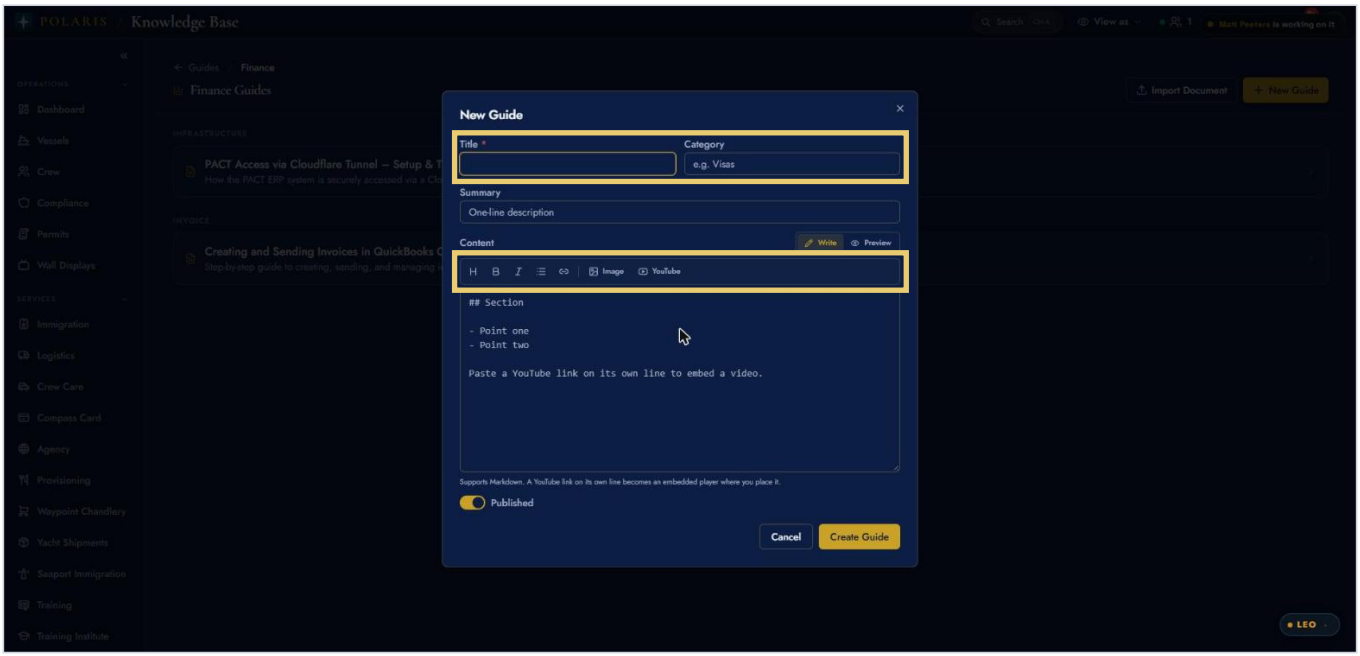

2 Click New Guide

Click **New Guide**. To turn an existing PDF or Word document into a guide instead, click **Import Document**, choose the file and click **Import & Create** — the text is extracted for you.

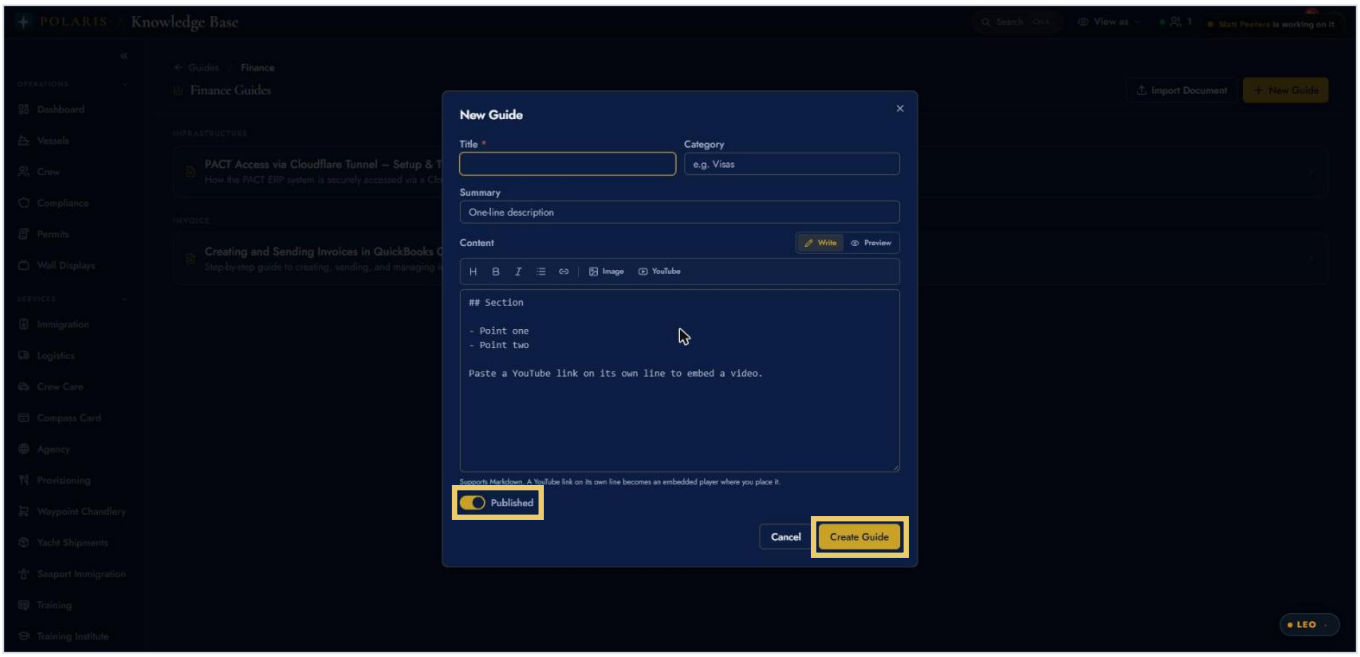

3 Write the guide

Enter a **Title** (required), a **Category** (guides are grouped by it) and a one-line **Summary**. Write the **Content** using the toolbar for headings, bold, lists and links; **Image** adds a picture and **YouTube** embeds a video. **Preview** shows how it will look.

4 Publish

Leave **Published** on for everyone to see it, or switch it off to keep it as a draft. Click **Create Guide**. Open a guide later to **Edit** it or download a **Branded PDF**.

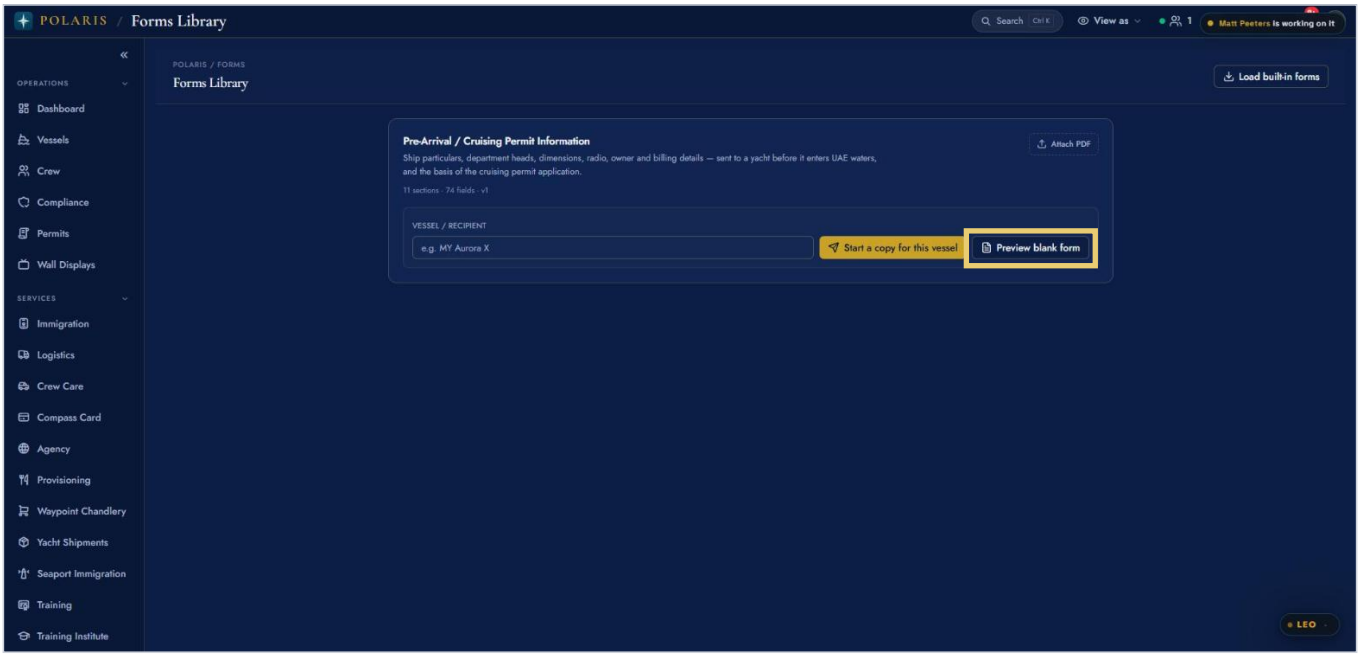

Send a form for a vessel to fill in

3 steps · about 2 min

Start a copy of a standard form, such as the Pre-Arrival / Cruising Permit Information, and share it.

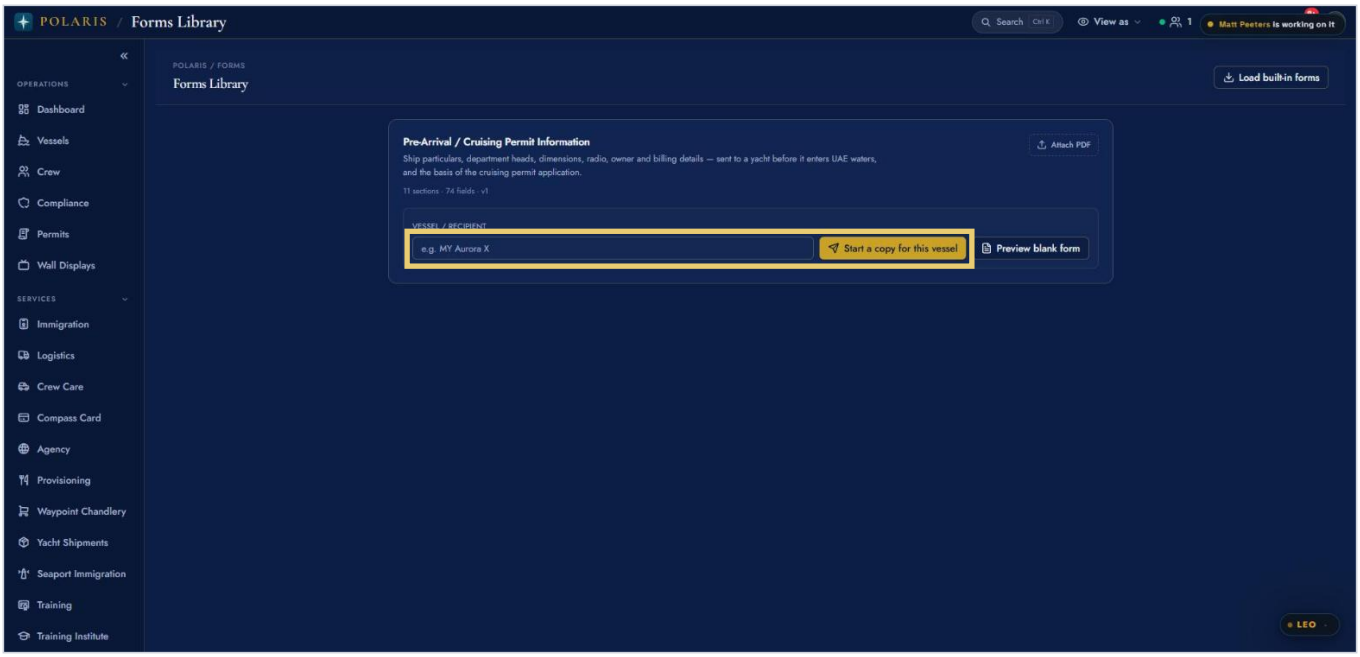

1 Open the Forms Library

Click **Forms Library**. Each form shows its sections and fields. **Preview blank form** shows it without starting anything.

2 Start a copy

Type the vessel or recipient in **Vessel / recipient** and click **Start a copy for this vessel**. The copy appears under the form with its status.

3 Share it or fill it in

Click **Share link** to copy a link the vessel can open without logging in, and send it to them. Or click **Open** to fill it in yourself — **Save** as you go and **Mark complete** when done.

> **Tip:** Attach PDF adds the official PDF version of a form for people to download.

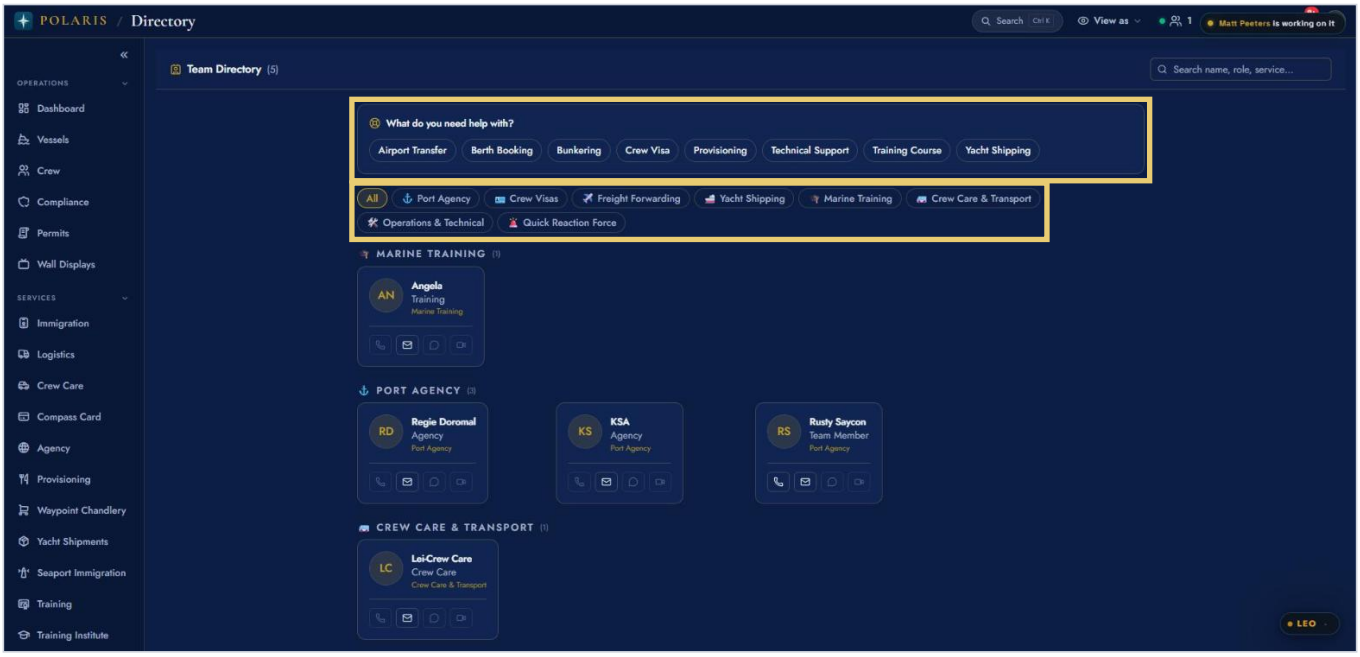

Find the right person (Team Directory)

2 steps · about 1 min

Look up a colleague by service or department and call, email, WhatsApp or Teams them.

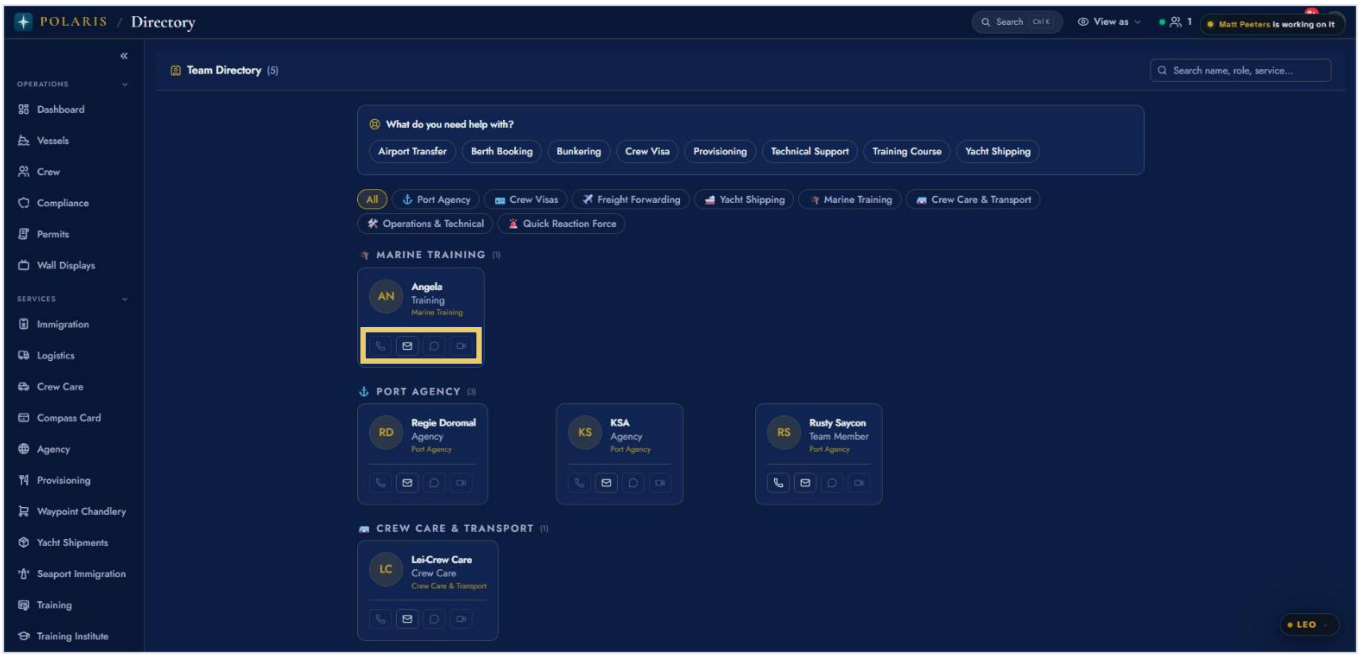

1 Find who to contact

Click **Directory**. Under **What do you need help with?** click a service — Airport Transfer, Berth Booking, Bunkering, Crew Visa … — to see who handles it. Or filter by department, or search by name, role or service.

2 Get in touch

Use the buttons on a card to **Call**, **Email**, **WhatsApp** or open **Teams**. Click the card for their full profile — office hours, languages and areas of expertise.

> **Tip:** Admins add and edit people with Add Member. Emergency contacts appear under Quick Reaction Force.

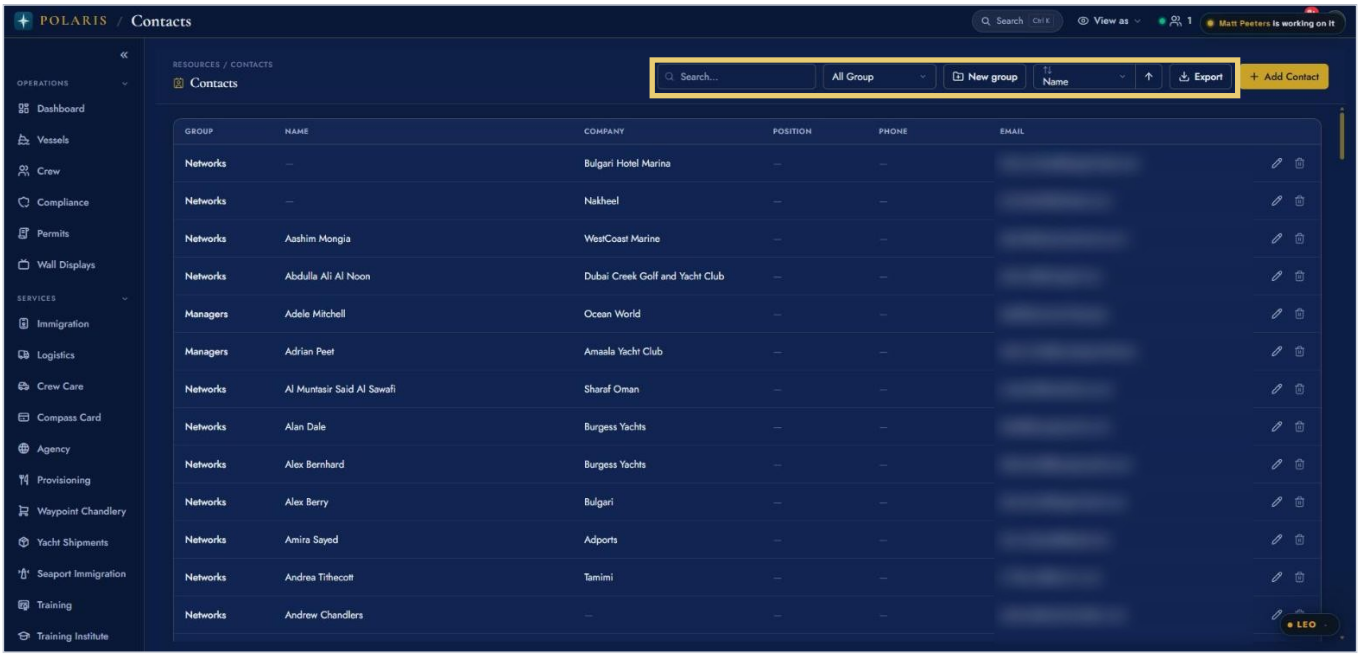

Keep shared contacts

2 steps · about 1 min

Store marina, management and captain contacts in groups everyone can use.

1 Find a contact

Click **Contacts**. Search, filter by group (Networks, Managers, Yacht Captains, …) and sort. **Export** downloads the list for Excel.

2 Add a contact

Click **Add Contact** and fill in the group, name, company, position, phone, email and notes, then **Add Contact**. **New group** adds a group of your own. The pencil edits a contact; the bin removes it.

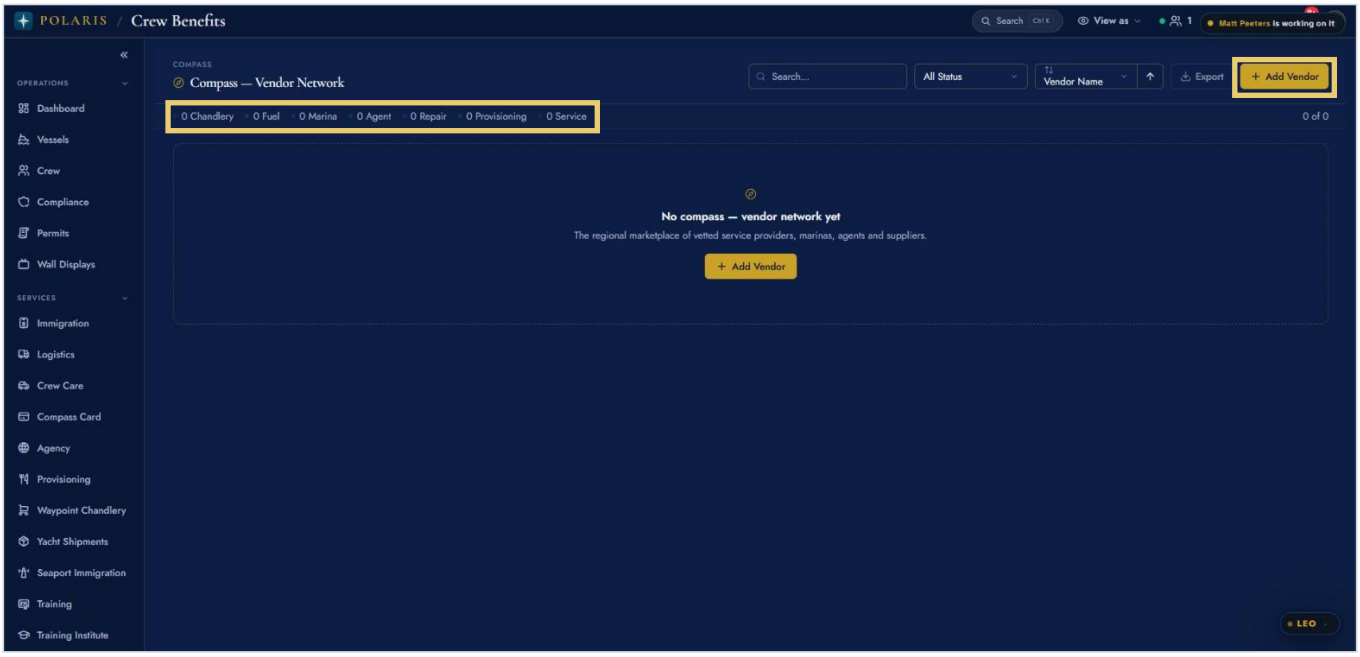

Add a vendor to the Compass network

1 steps · about 1 min

Build the list of vetted chandlers, fuel suppliers, marinas, agents and service providers.

1 Add a vendor

Click **Crew Benefits**, then **Add Vendor**. **Vendor Name** is required; add the category (chandlery, fuel, marina, agent, repair, provisioning, service), city, country, contact details, website and a 1–5 rating. Click **Add Vendor**.

> **Tip:** Click a category count under the title to filter; Export downloads the list.

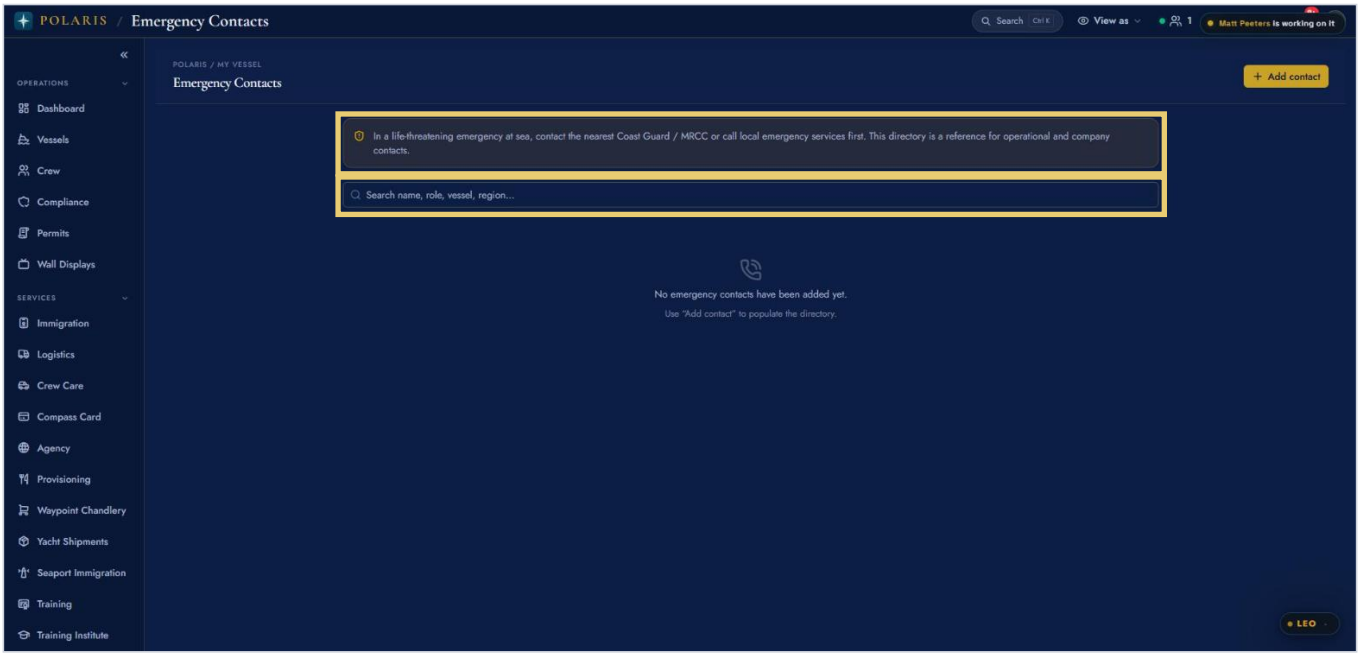

Find an emergency contact

2 steps · about 1 min

Look up Coast Guard, medical, DPA, port and other emergency contacts by vessel or region.

1 Search the directory

Click **Emergency Contacts** and search by name, role, vessel or region. Contacts are grouped — Company 24/7, DPA / CSO, Coast Guard / MRCC, Medical, Local Agent, Port Authority, Flag State, Insurer / P&I and more — with tap-to-call numbers.

> **Tip:** In a life-threatening emergency at sea, contact the nearest Coast Guard / MRCC or local emergency services first.

2 Add a contact (admins)

Click **Add contact**, choose the category and whether it applies to all vessels, one vessel or a region, and enter the name plus a phone or email. Tick **Available 24/7** if they are, then **Save**.
