Run the Training Institute

5 steps · about 4 min

Manage instructors, students, courses and classes, and record certifications.

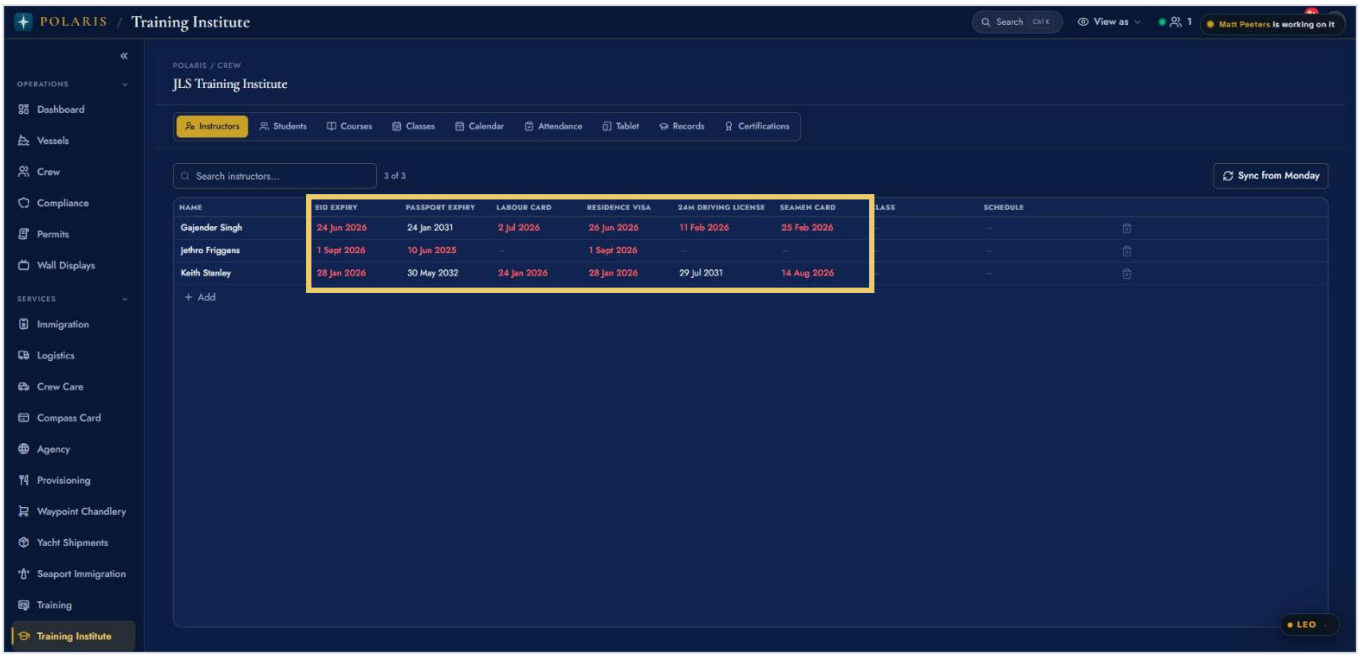

1 Open Training Institute

Click **Training Institute**. The tabs cover **Instructors**, **Students**, **Courses**, **Classes**, **Calendar**, **Attendance**, **Tablet** (the training-room sign-in tablet), **Records** and **Certifications**.

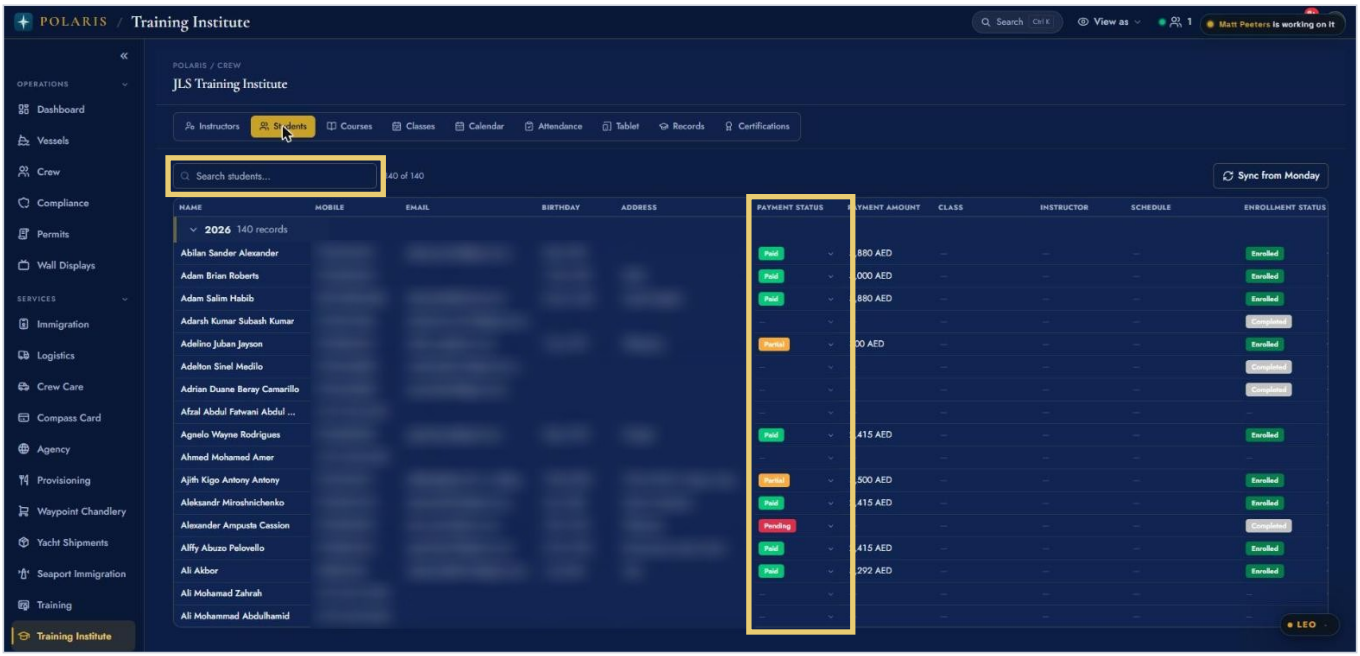

2 Keep instructors' documents in date

Instructors shows each instructor's Emirates ID, passport, labour card, residence visa, driving licence and seaman's card expiry dates. Dates in red have expired or are about to.

3 Enrol a student

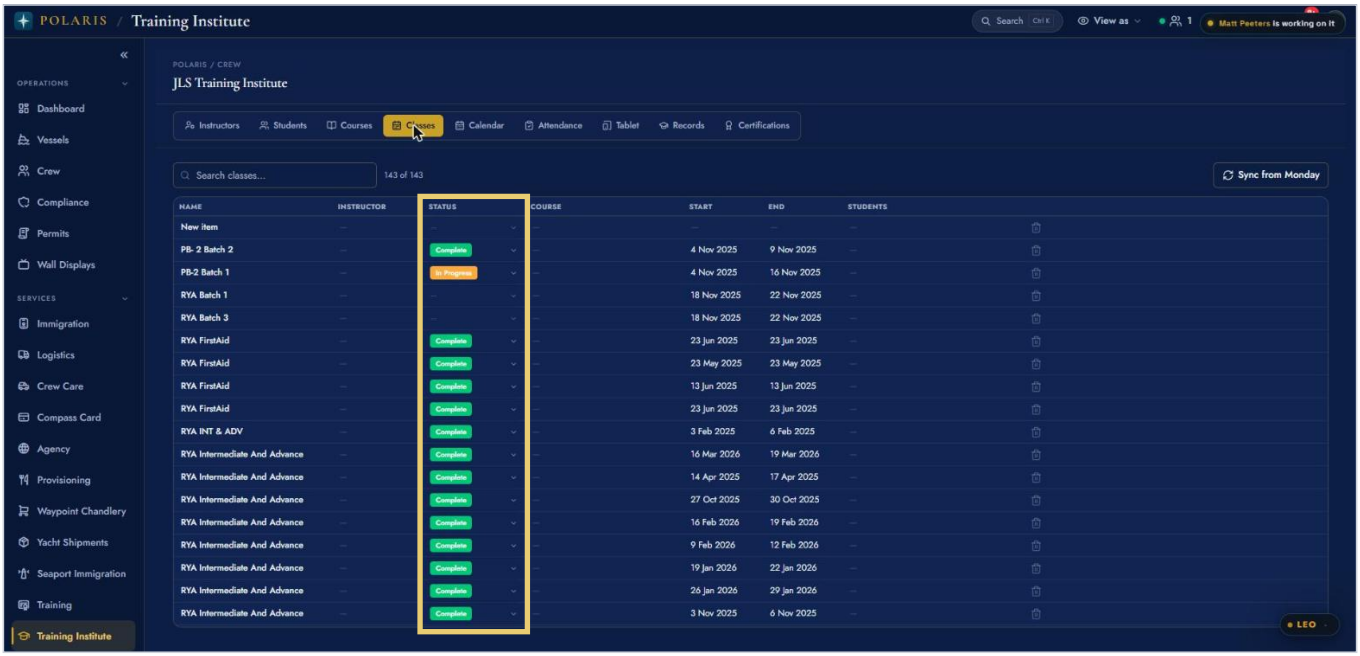

On **Students**, click **Add** at the bottom of the list, type the student's name and press **Add**. Then fill in their row — mobile, email, birthday, payment status and amount, class, instructor and **Enrollment Status**. The paperclip attaches their files.

> **Tip:** These boards save as you type, and the bin deletes a row without asking. Sync from Monday pulls the latest from Monday.com.

4 Set up classes

On **Classes**, add a class the same way and set its instructor, **Status** (In Progress, On Hold, Pending Approval, Complete), course, start and end dates and students. **Calendar** holds events; **Attendance** shows who signed in on the tablet.

5 Record a certification

On **Certifications** (or **Records** for training records), click **Add Certification**. Choose the crew member, the certificate, its type (STCW, Medical, Safety, Flag State, Other), issuing body, issue and expiry dates, and attach the certificate file. Polaris warns when certificates are expiring.
