Schedule reports to a vessel

4 steps · about 4 min

Opt a vessel in to automatic emailed reports, choose who receives them and when.

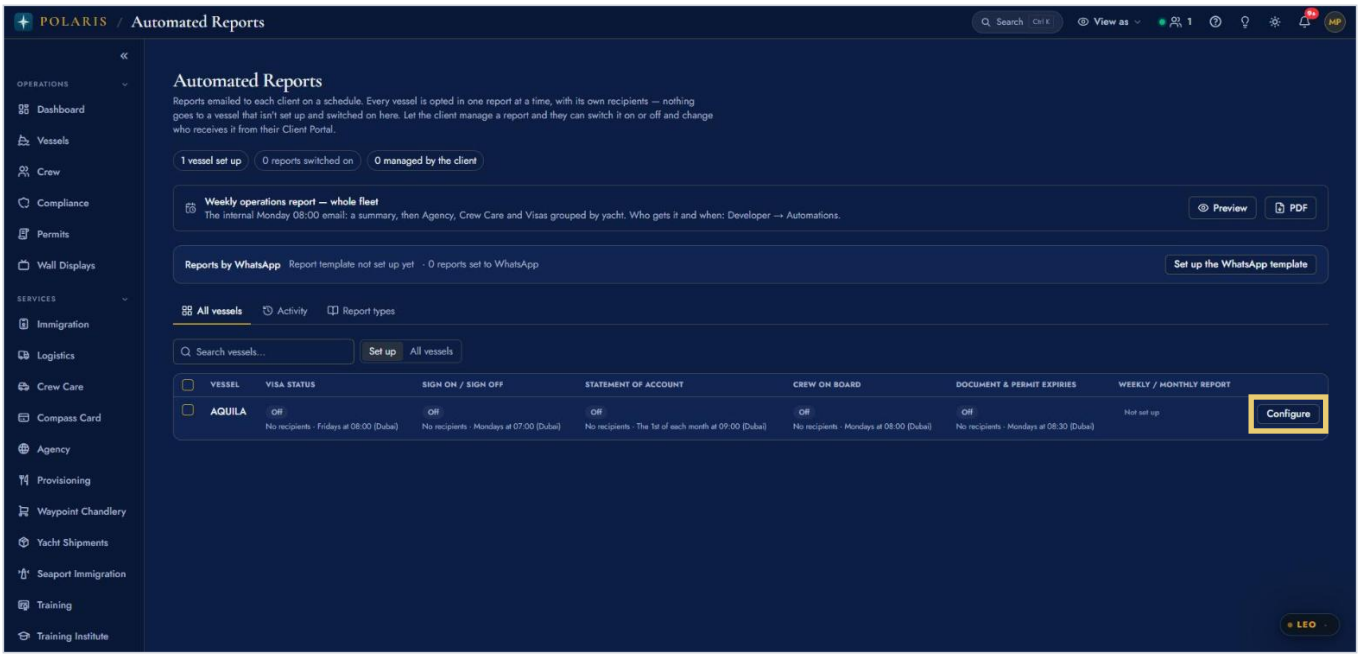

1 Open Automated Reports

Click **Automated Reports**. **All vessels** shows each vessel that's set up and whether each report — Visa status, Sign On / Sign Off, Statement of account, Crew on board, Document & permit expiries, Weekly / monthly — is on or off. Nothing goes to a vessel that isn't set up and switched on here.

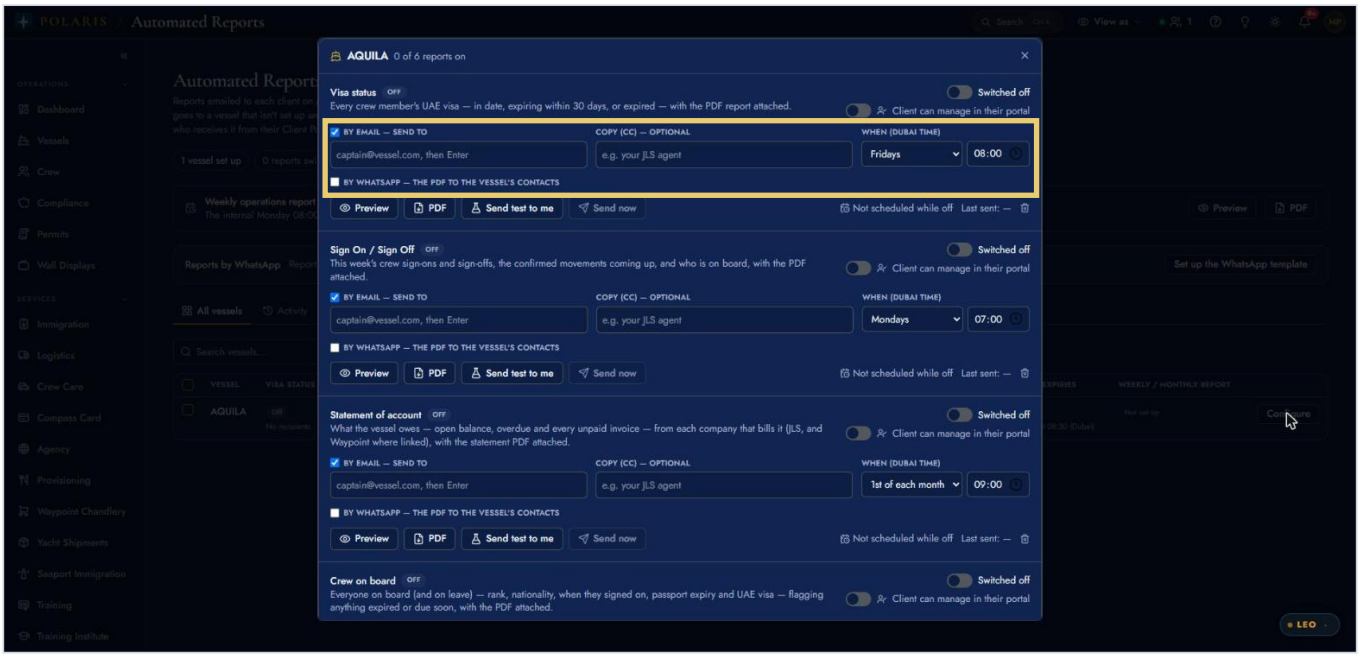

2 Set up a vessel

Switch to **All vessels** in the filter, find the vessel and click **Set up** (or **Configure** if it's already set up). To opt several at once, tick them and use **Opt in to …**.

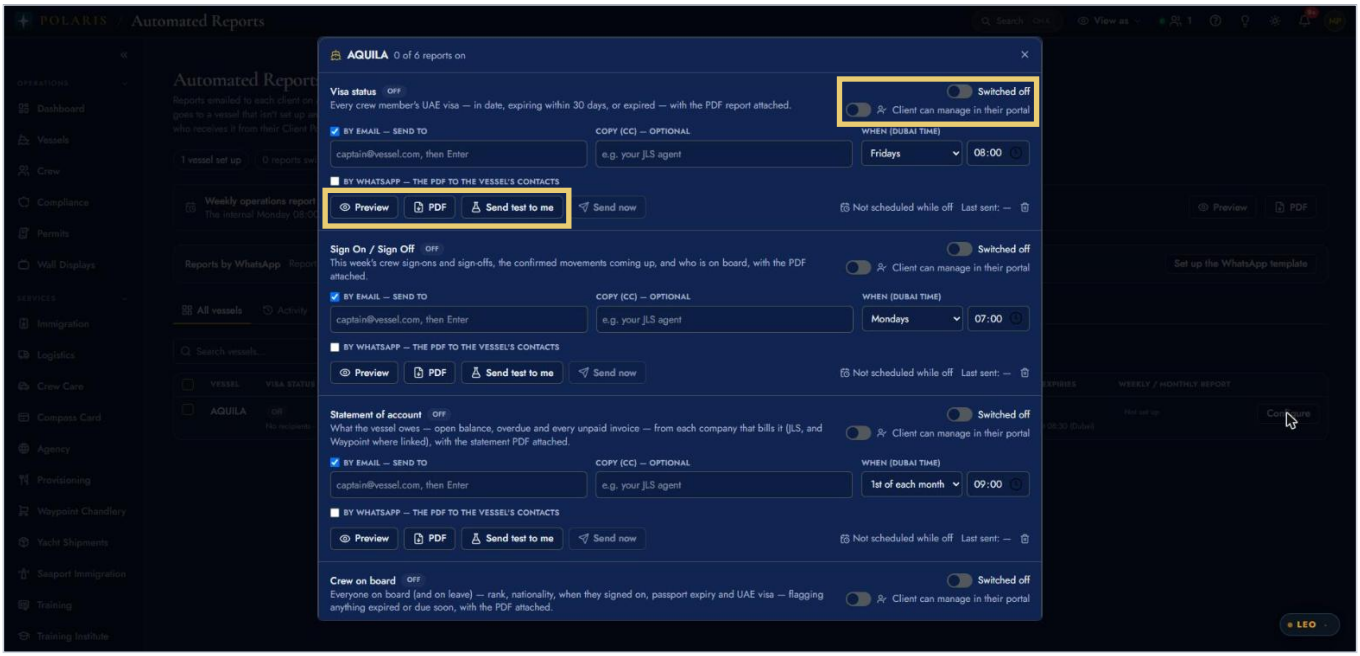

3 Choose recipients and timing

For each report, add the email addresses under **By email — send to** (press Enter after each), an optional **Copy (CC)**, and **When (Dubai time)** — day and time. Tick **By WhatsApp** to send the PDF to the vessel's WhatsApp contacts too.

4 Check it, then switch it on

Preview and **PDF** show what the report looks like; **Send test to me** emails it to you. When it's right, turn on **Switched off -> Sending**. **Client can manage in their portal** lets the captain change recipients themselves.

> **Tip:** Send now emails the client straight away, after a confirmation. The fleet-wide weekly operations report is set up separately, under Settings -> Automations.
