POLARIS · HOW-TO GUIDE · REPORTS

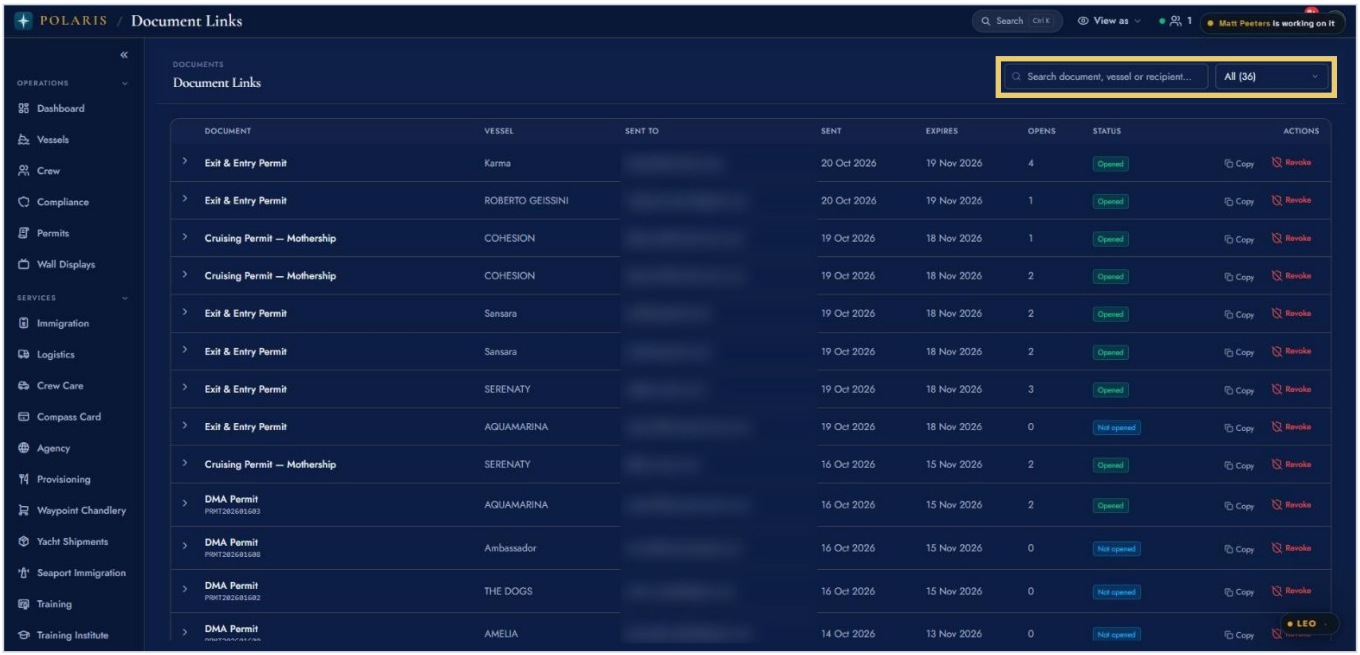

Track and revoke document links

3 steps · about 2 min

See every secure document link sent to clients, who opened it, and revoke one if needed.

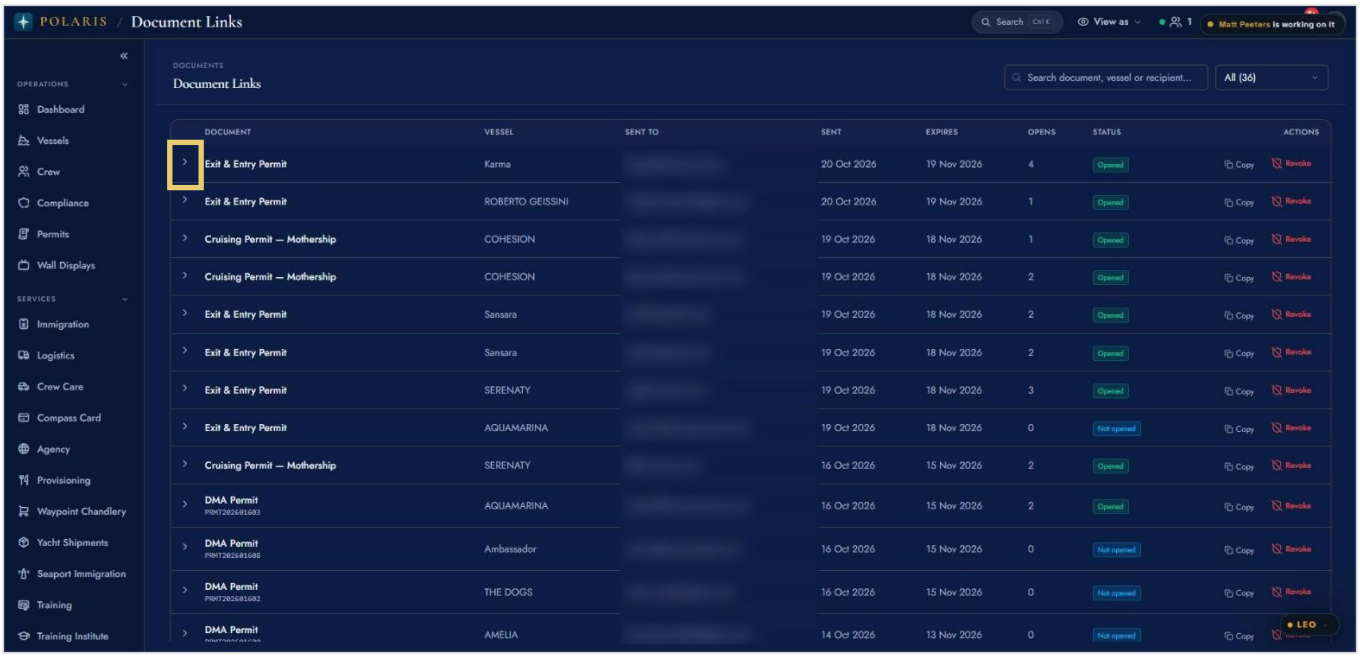

1 Open Document Links

Click **Document Links**. Every secure link sent to a client — permits, visas, reports — is listed with the vessel, recipient, sent and expiry dates, how many times it was opened and its status. Search, or filter by **Not opened**, **Opened**, **Expired** or **Revoked**.

2 See who opened it

Click the arrow at the start of a row to see each time the link was viewed or downloaded, with the date and time.

3 Copy or revoke

Copy puts the link on your clipboard to resend. **Revoke** stops the link working (you'll be asked to confirm) — use it if a document went to the wrong person. A revoked link can be **Restored**.
