Ask the Warehouse for an incoming, picking or dispatch

4 steps · about 3 min

Raise a request to the Warehouse with the items and documents, and follow it to completion.

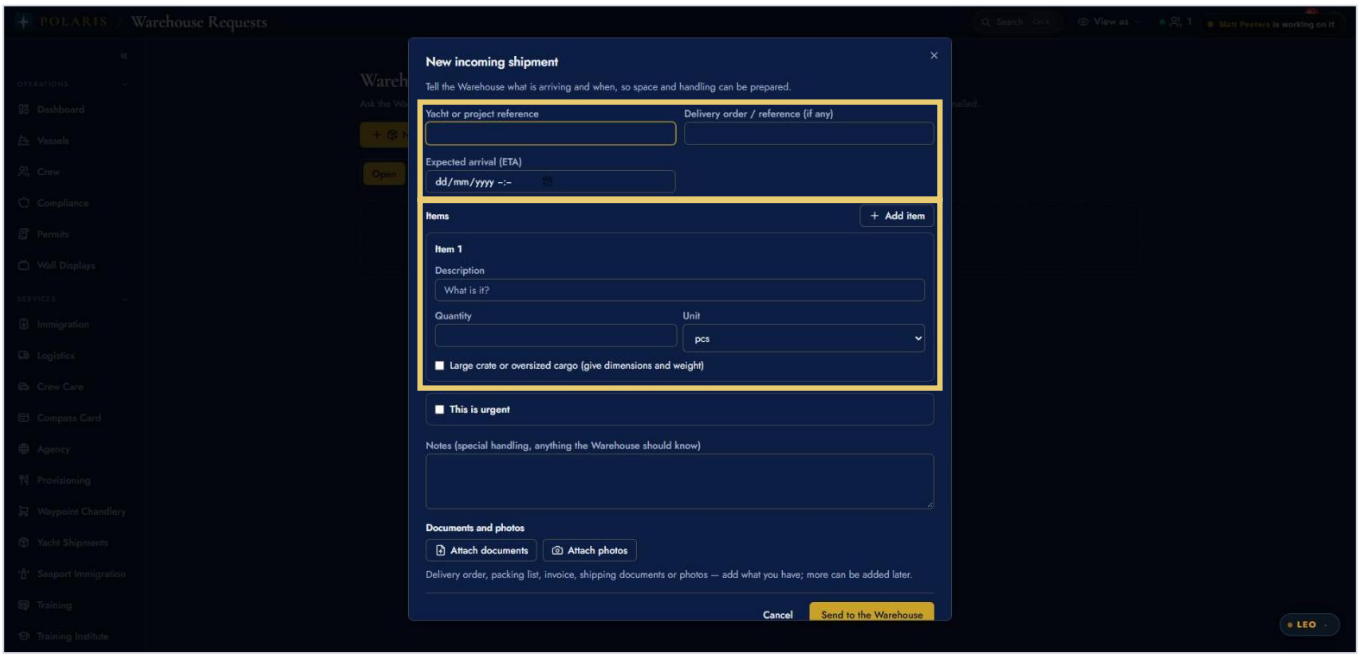

1 Choose the type of request

Click **Warehouse Requests**, then **New incoming shipment** (something arriving), **New picking request** (items to prepare) or **New dispatch request** (items to deliver to a yacht).

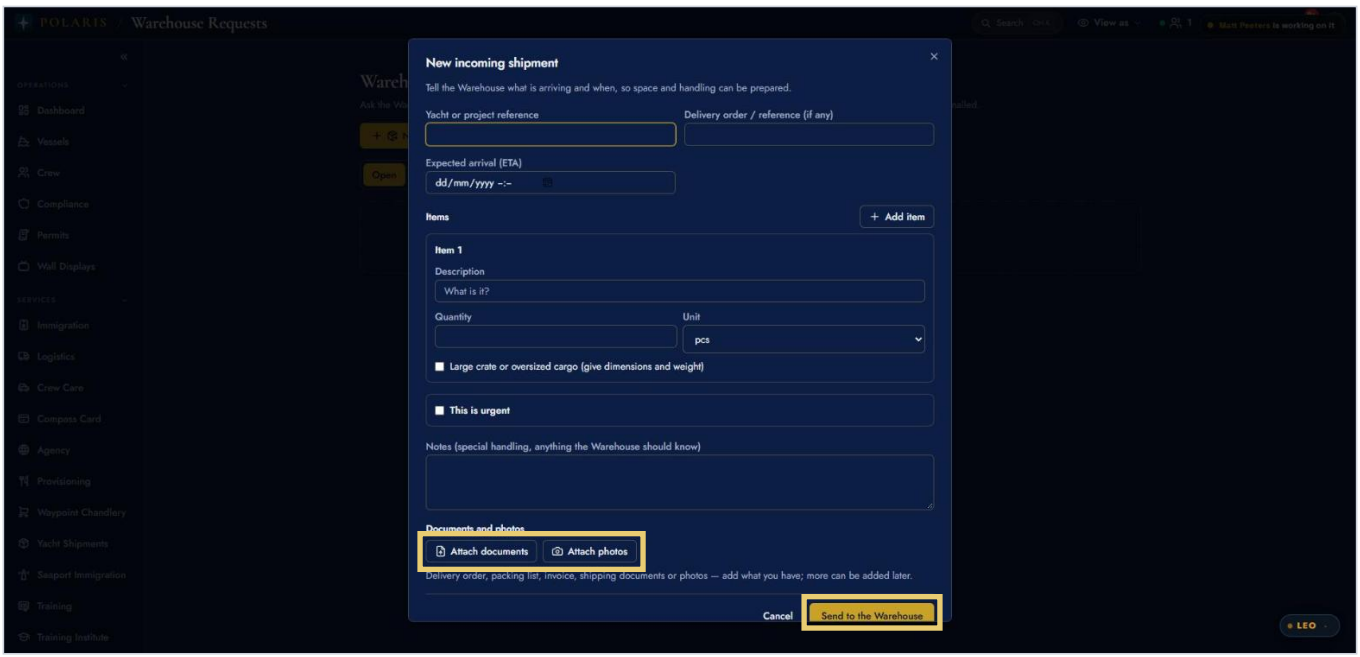

2 Fill in the request

Add the yacht or project reference, any delivery order reference and the date — ETA for incoming, needed-by for picking, delivery date for dispatch (dispatch also needs the berth and recipient). List each item with a description and quantity; tick **Large crate or oversized cargo** to give dimensions and weight.

3 Attach and send

Tick **This is urgent** if it is (and say why and by when). **Attach documents** and **Attach photos** — delivery order, packing list, invoice. Click **Send to the Warehouse**; the Warehouse and Logistics are emailed.

4 Follow it up

Use **Open**, **Mine** and **All**, the type filter and search to find requests. Open one to see its progress and add comments — comments and status changes are emailed to the Warehouse, Logistics and you.
