POLARIS · HOW-TO GUIDE · SERVICES

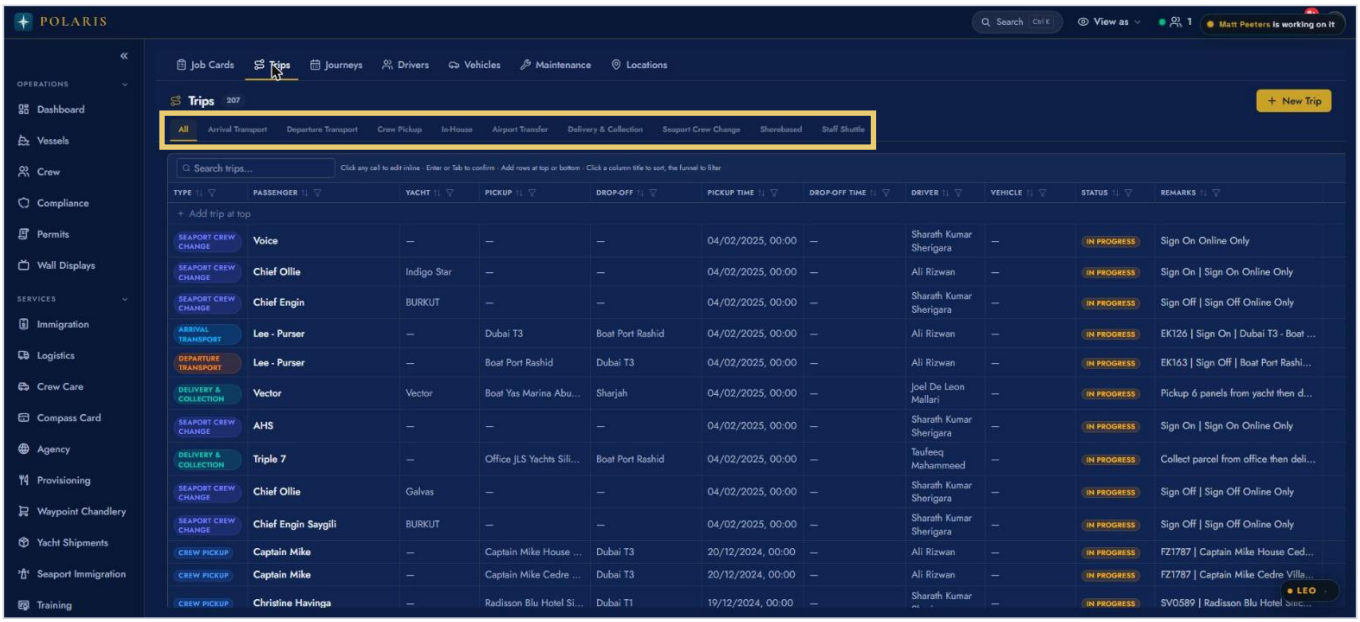

Book a trip and assign a driver

4 steps · about 3 min

Create transport trips — airport runs, crew changes, staff shuttles — and assign drivers and vehicles.

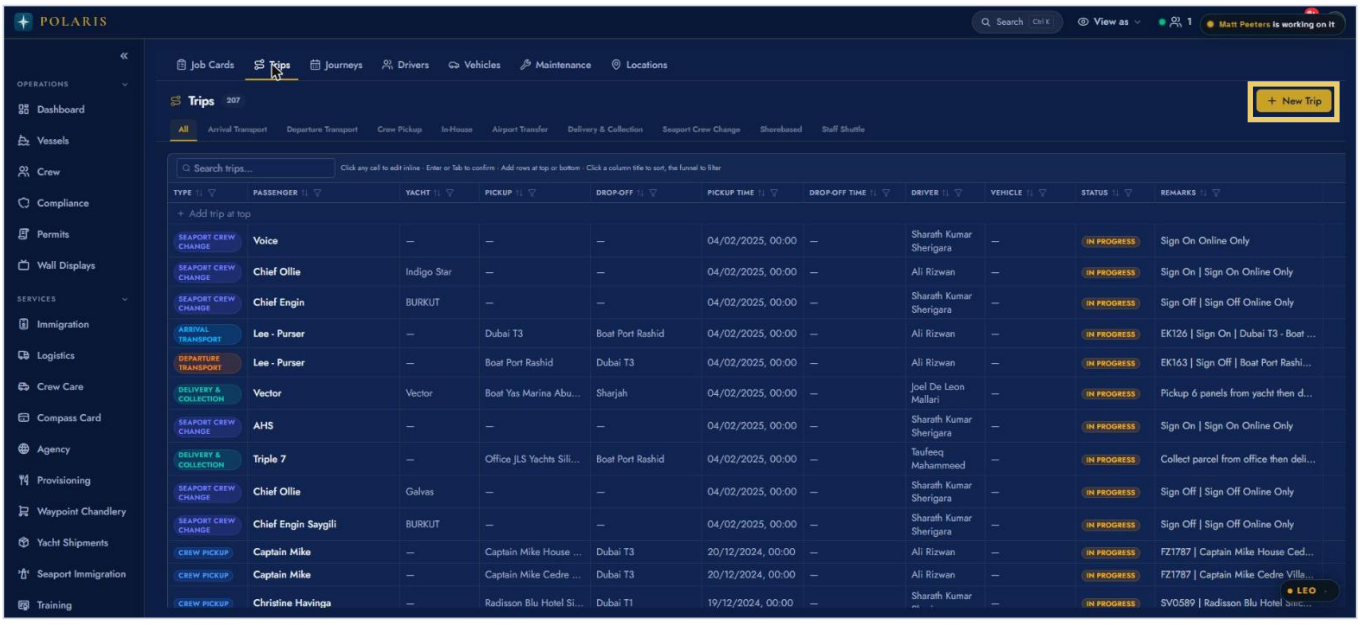

1 Open Trips

In **Crew Care**, click **Trips**. Filter by type with the chips — Arrival Transport, Departure Transport, Crew Pickup, Airport Transfer, Seaport Crew Change, **Staff Shuttle** and more — or search.

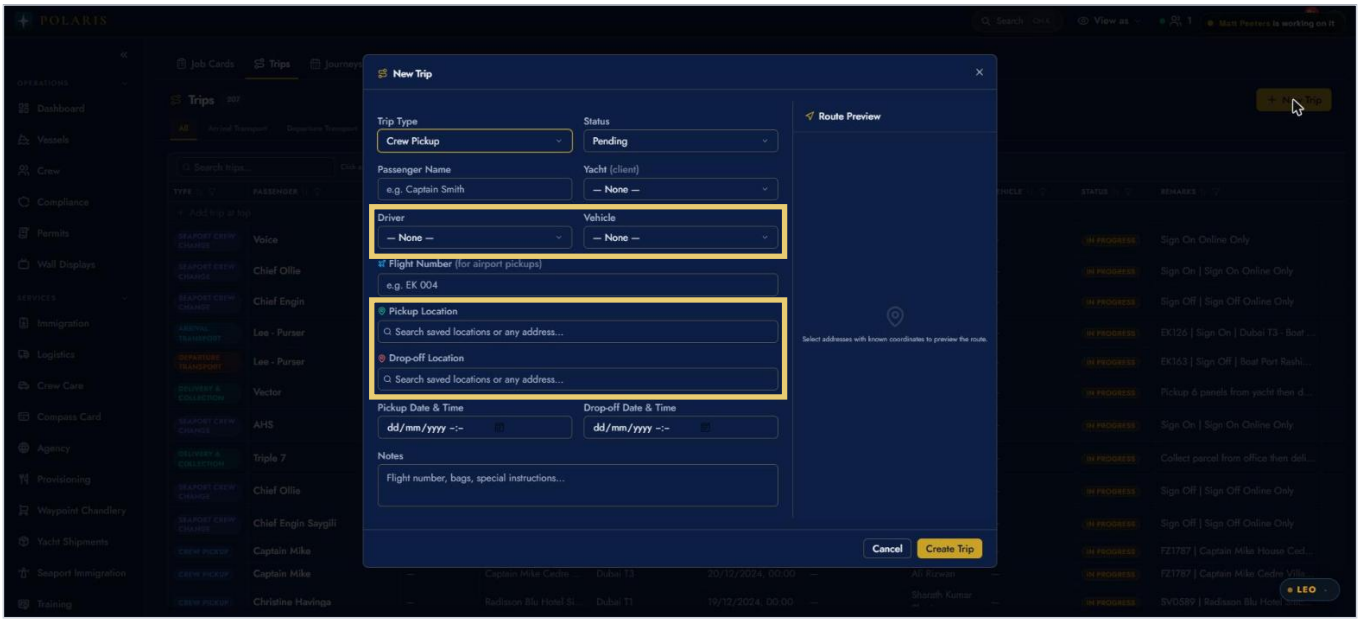

2 Click New Trip

Click **New Trip**.

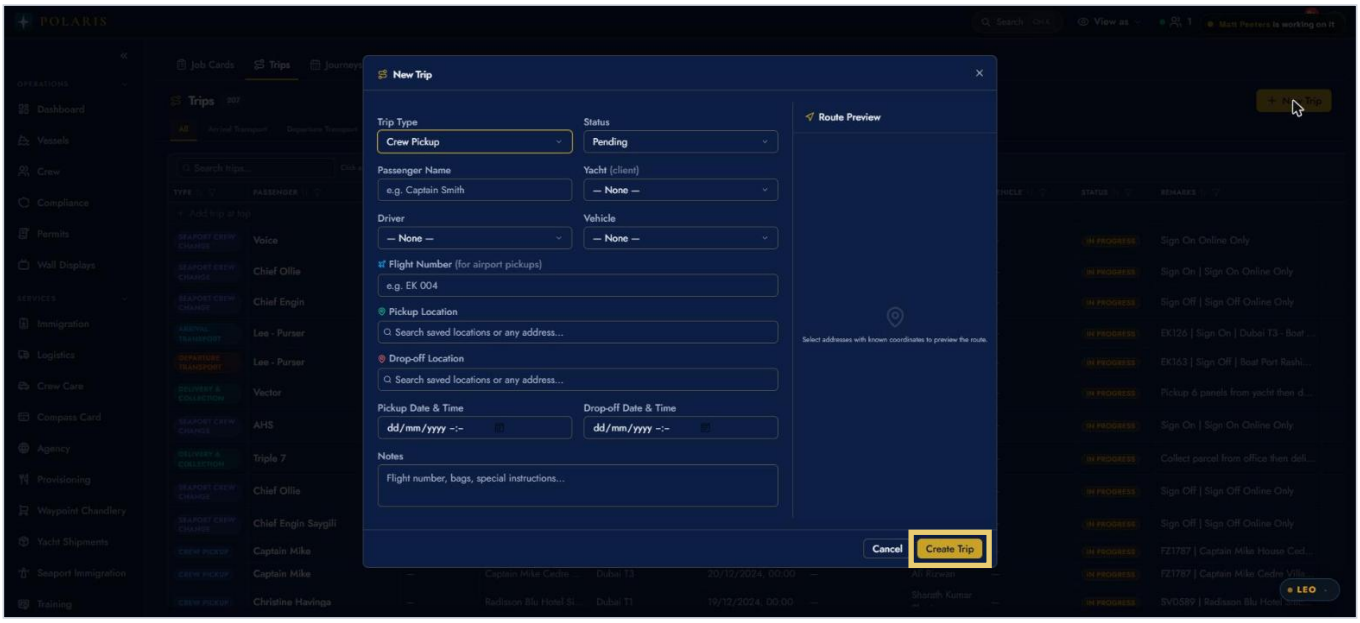

3 Fill in the trip

Choose the **Trip Type** and **Status**, the **Passenger Name** and **Yacht**, then the **Driver** and **Vehicle**. Add the **Flight Number** for airport pickups, the **Pickup** and **Drop-off Location** (saved locations or any address) and the times. The route shows on the map.

4 Create the trip

Click **Create Trip**.

> **Tip:** In the Trips table you can click any cell to change it — Enter or Tab saves it straight away. Add trip at top adds a blank row.
