Manage chandlery suppliers

4 steps · about 2 min

Add and update Waypoint's suppliers, and keep them in step with Lightspeed and QuickBooks.

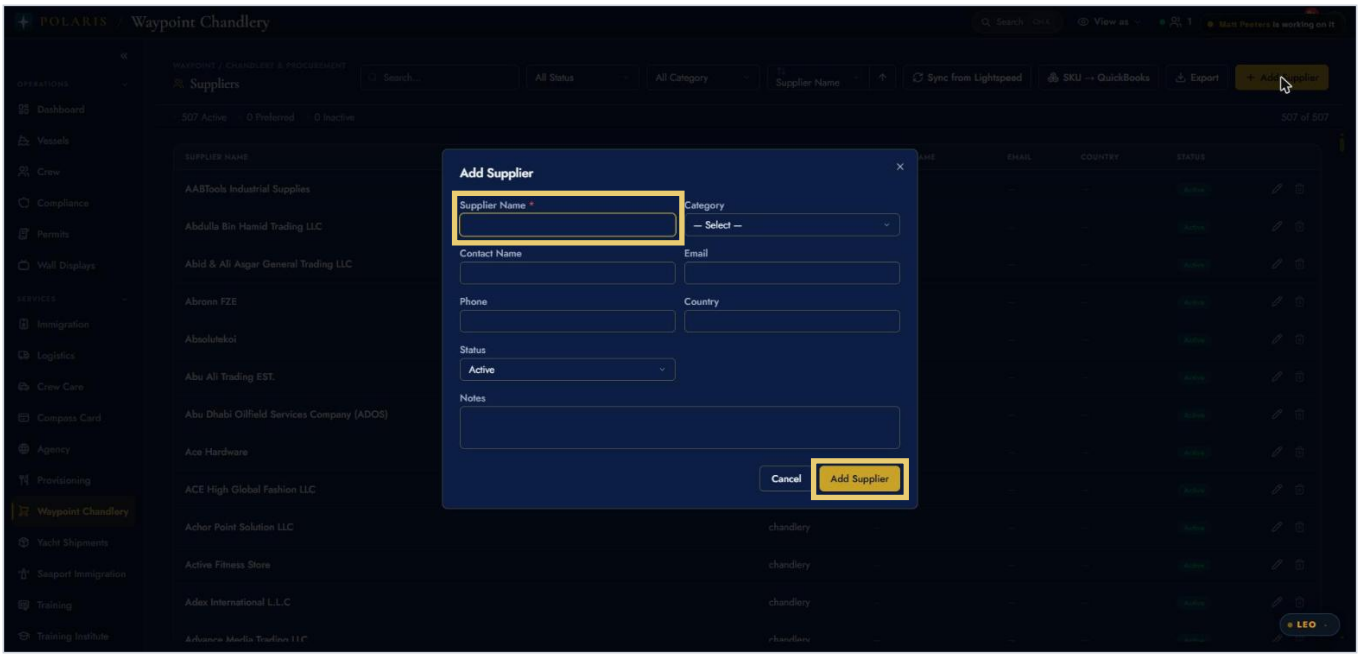

1 Open Waypoint Chandlery

Click **Waypoint Chandlery**. **Suppliers** lists every supplier with category, contact, email, country and status (**Active**, **Preferred**, **Inactive**). Search or filter by status and category.

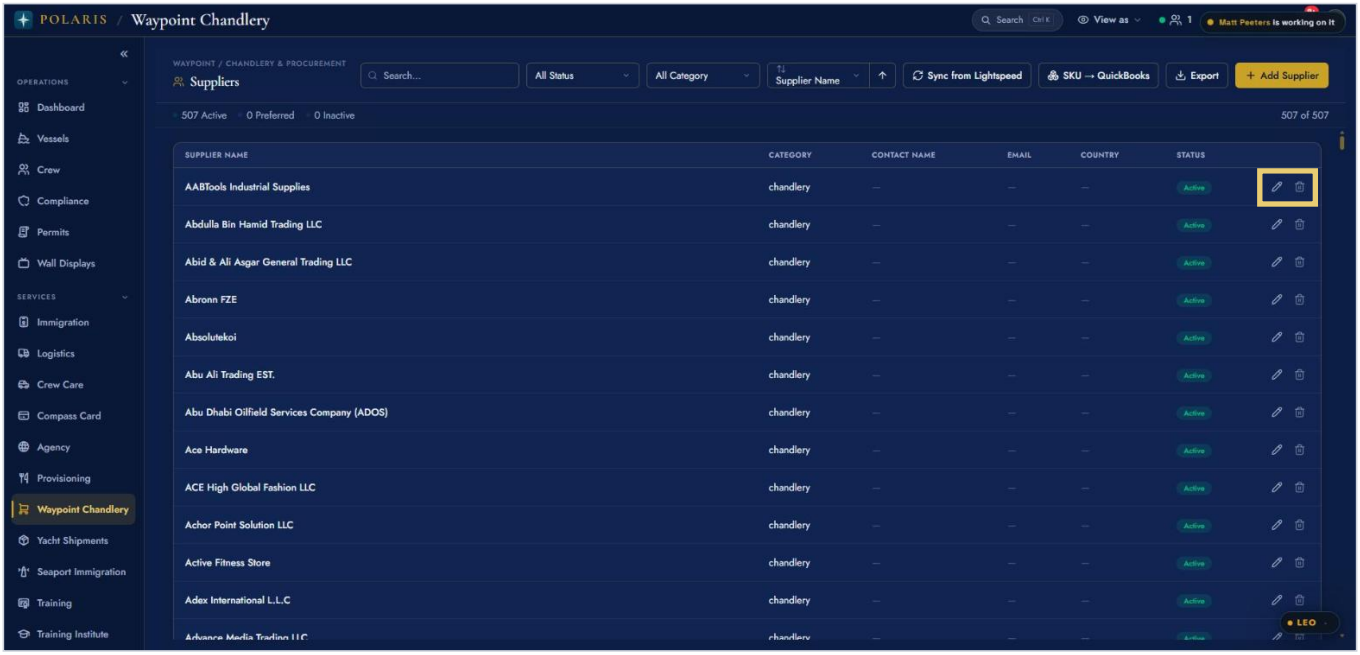

2 Add a supplier

Click **Add Supplier**. Only **Supplier Name** is required; add the category, contact name, email, phone, country, status and notes, then click **Add Supplier**.

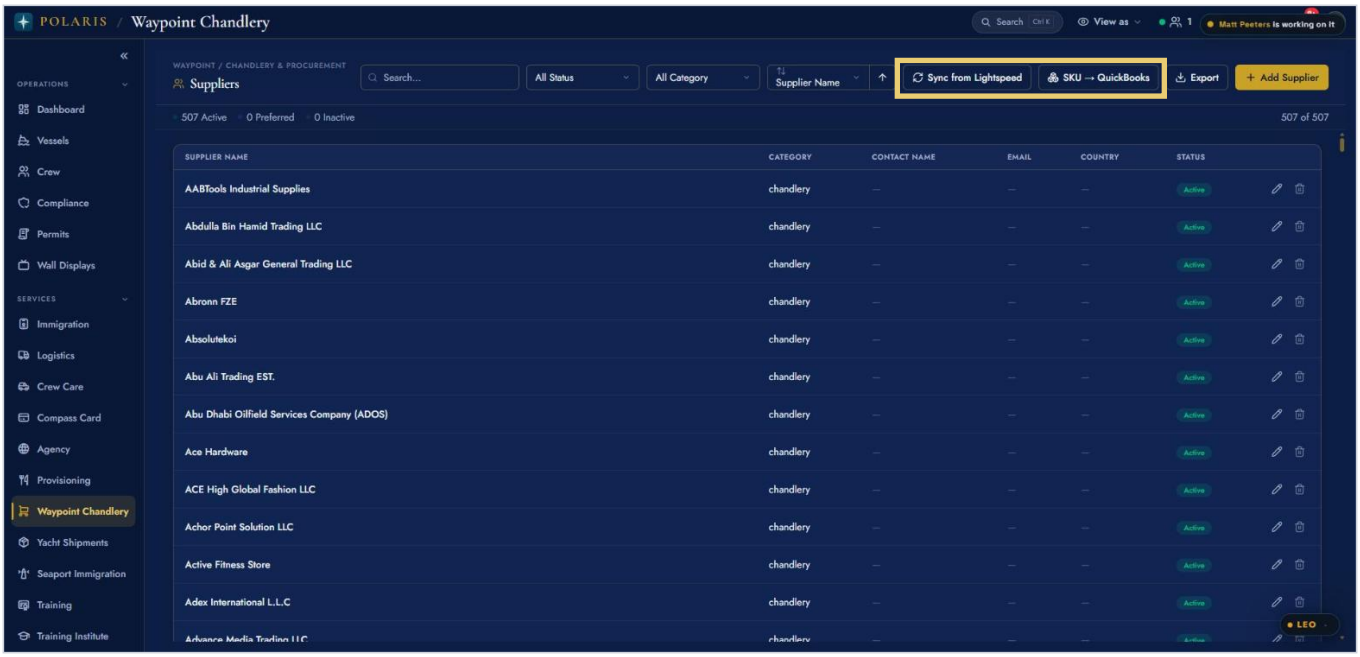

3 Edit or remove

Use the pencil on a row to edit a supplier (for example to mark them Preferred), or the bin to remove them. **Export** downloads the list.

4 Lightspeed and QuickBooks

Sync from Lightspeed brings the supplier list across from the Lightspeed till system straight away. **SKU -> QuickBooks** opens a panel for creating QuickBooks items from Lightspeed products.

> **Tip:** Sync from Lightspeed runs as soon as you click it — no confirmation.
