Manage placed crew and payroll

4 steps · about 4 min

Add managed crew, post vacancies, track certificates, contracts, leave and payroll.

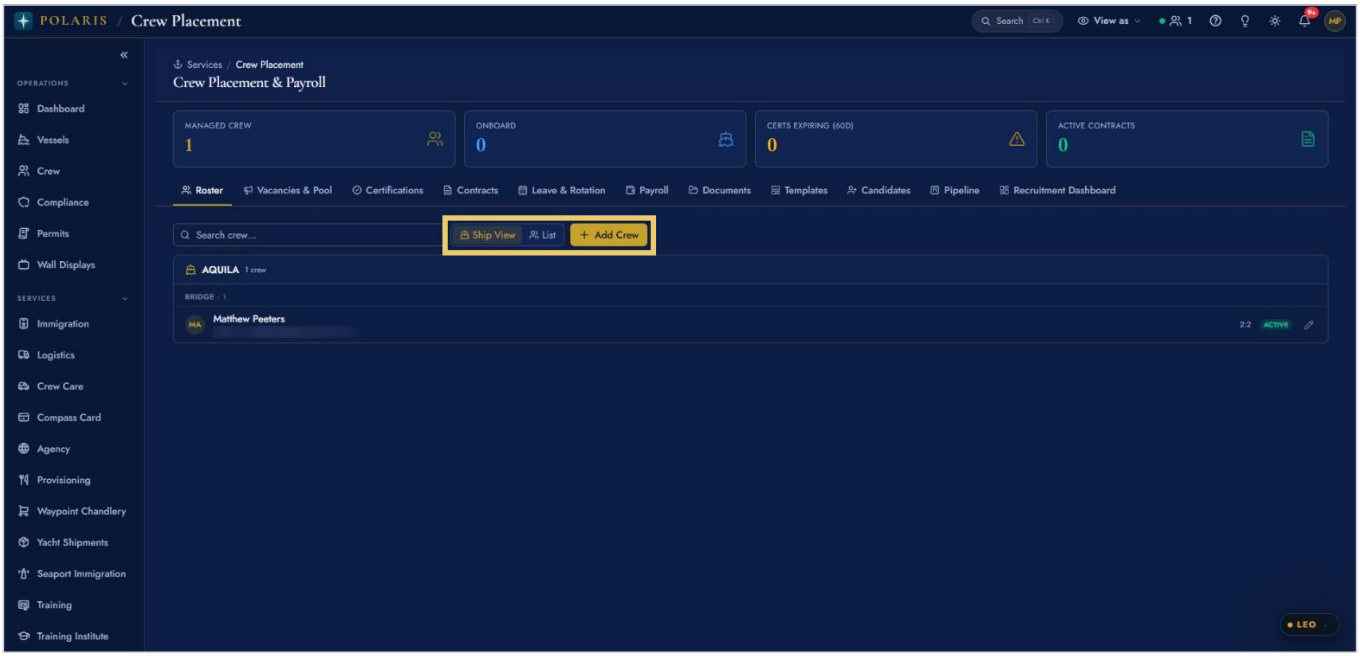

1 Open Crew Placement

Click **Crew Placement**. The cards count **Managed Crew**, **Onboard**, **Certs Expiring (60d)** and **Active Contracts**. The tabs run from **Roster** through **Payroll** to the recruitment tabs (**Candidates**, **Pipeline**, **Recruitment Dashboard**).

2 Add a crew member

On **Roster**, click **Add Crew**. Only **Full name** is required; add rank, contact details, nationality, start date, department, vessel, rotation (e.g. 2:2) and salary, then **Save**. Switch between **Ship View** (grouped by vessel) and **List**.

3 Keep records up to date

Click a crew member to open their profile and add documents, certifications, contracts, payslips and bank accounts. Or use the tabs:

- **Certifications** — **Add Certificate** with its number, issuer and expiry.
- **Contracts** — **New Contract** walks through salary, trial & notice, travel and review, then **Create contract**; **PDF** produces the contract.
- **Leave & Rotation** — **Schedule Leave** for a crew member.
- **Vacancies & Pool** — **Post Vacancy** for an open role.

4 Run payroll

On **Payroll**, **New Payslip** adds one payslip; **Run Payroll** creates payslips for every eligible crew member for a month; **Final Pay** works out a leaver's final pay and marks them inactive.

> **Tip:** Run Payroll and Final Pay take effect as soon as you confirm them — check the month and the crew member first.
