Publish a Crew Academy course

5 steps · about 4 min

Build an online course for yacht crew, publish it and offer it to vessels.

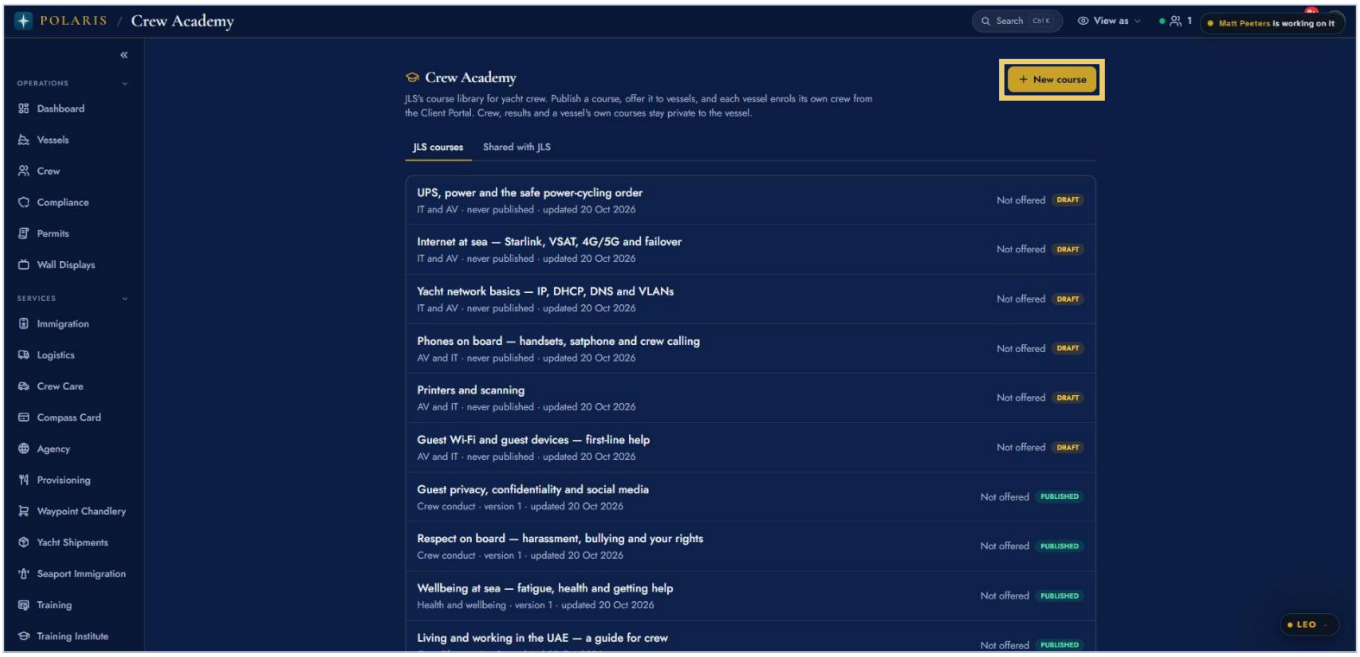

1 Open Crew Academy

Click **Crew Academy**. **JLS courses** lists every course with its category, version, which vessels it's offered to and whether it's **Draft** or **Published**. **Shared with JLS** shows vessels' own courses and crew training records shared with us.

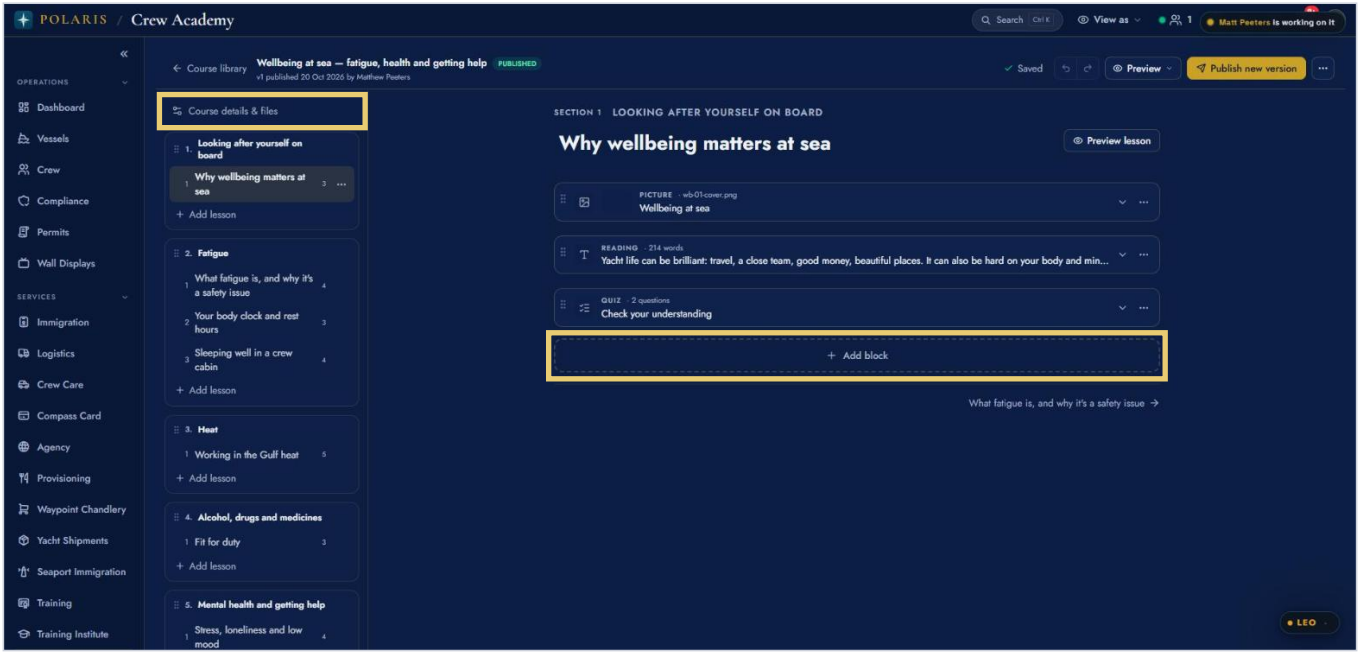

2 Create or open a course

Click **New course**, type its title and the editor opens. Or click an existing course to edit it.

3 Build the lessons

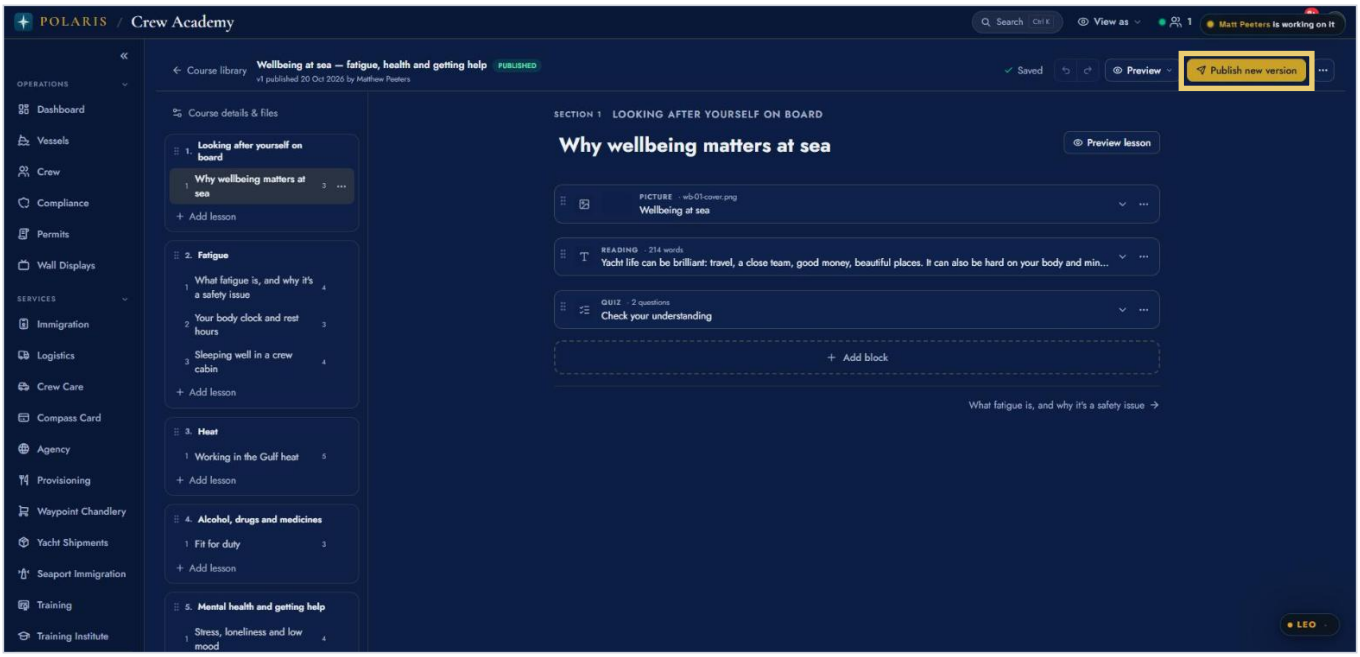

The outline on the left holds sections and lessons — **Add lesson**, or use the ** **menus to rename, move or delete. In a lesson,** Add block **inserts text, video, PDF, picture, a quiz, an acknowledgement or exercises.** Course details & files** sets the summary, minutes to complete, pass mark and refresher period.

> **Tip:** The editor saves on its own — the top bar shows Saved. Preview shows the course as crew will see it.

4 Publish

Click **Publish** (or **Publish new version** for a course already out) and confirm. If anything still needs fixing, the button lists it first.

5 Offer it to vessels

Open the ** **menu (top right) ->** Vessels**, then tick** Every vessel **or choose particular vessels, and** Save**. Each vessel then enrols its own crew from the Client Portal.
