POLARIS

Reports How-to Guides

7 guides · step by step, with screenshots

Contents

1. Produce and send a visa report
See every crew member's visa status for one vessel or the fleet, and send the report to the vessel.

2. Check crew movements (Sign On/Off report)
See who is on board and the latest sign-ons and sign-offs, for a vessel or the fleet.

3. Schedule reports to a vessel
Opt a vessel in to automatic emailed reports, choose who receives them and when.

4. Check crew documents for expiry
See which crew documents are valid, expiring within 90 days or expired, by vessel.

5. Track and revoke document links
See every secure document link sent to clients, who opened it, and revoke one if needed.

6. Sync visas from the Crew Visa Tracker
Bring visa records in line with the SharePoint Crew Visa Tracker spreadsheet.

7. Merge duplicate crew records
Find the same person recorded twice and merge them into one profile.

Produce and send a visa report

3 steps · about 2 min

See every crew member's visa status for one vessel or the fleet, and send the report to the vessel.

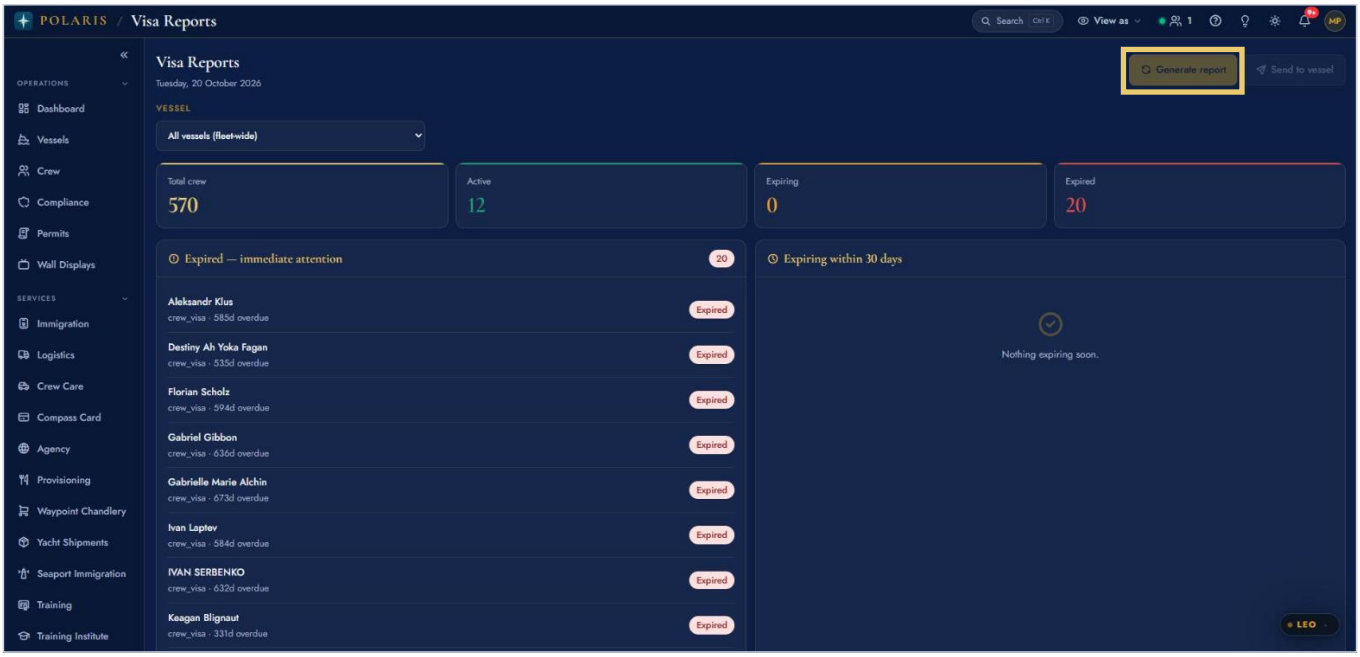

1 Choose the vessel

Click **Visa Reports** and pick a vessel in **Vessel** (or leave **All vessels (fleet-wide)**). The cards count total crew and active, expiring and expired visas, with lists of who has expired and who expires within 30 days.

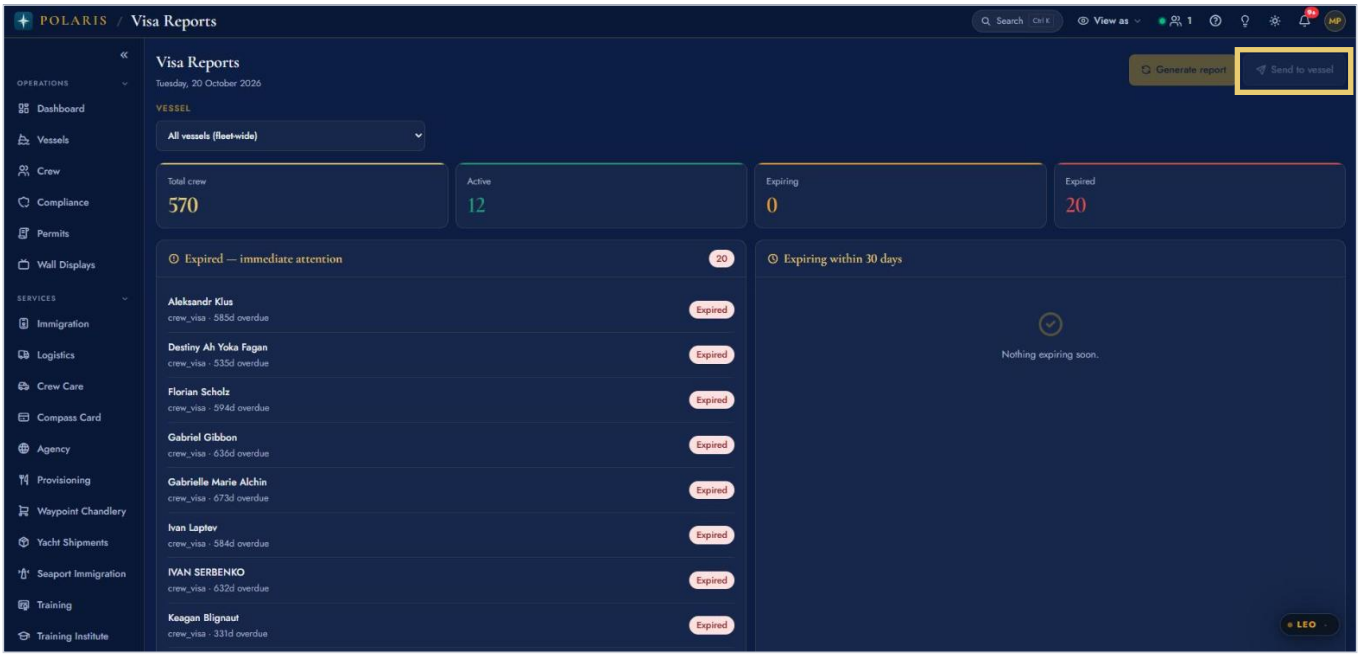

2 Generate the report

Click **Generate report**. It's added to **Report history** at the bottom of the page.

3 Send it to the vessel

Click **Send to vessel**, check the email address and **Confirm & send**. If the vessel has nobody to send to, set its recipients up in **Reports -> Automated Reports** first.

Check crew movements (Sign On/Off report)

1 steps · about 1 min

See who is on board and the latest sign-ons and sign-offs, for a vessel or the fleet.

1 Open the report

Click **Sign On/Off** under Reports and pick a vessel at the top right (or **All vessels**). The cards show **Onboard now**, **Sign-ons (7d)**, **Sign-offs (7d)** and **Upcoming**, with the latest sign-ons and sign-offs listed below.

> **Tip:** To record a movement, use Immigration -> Sign On / Off. See "Record a sign on or sign off".

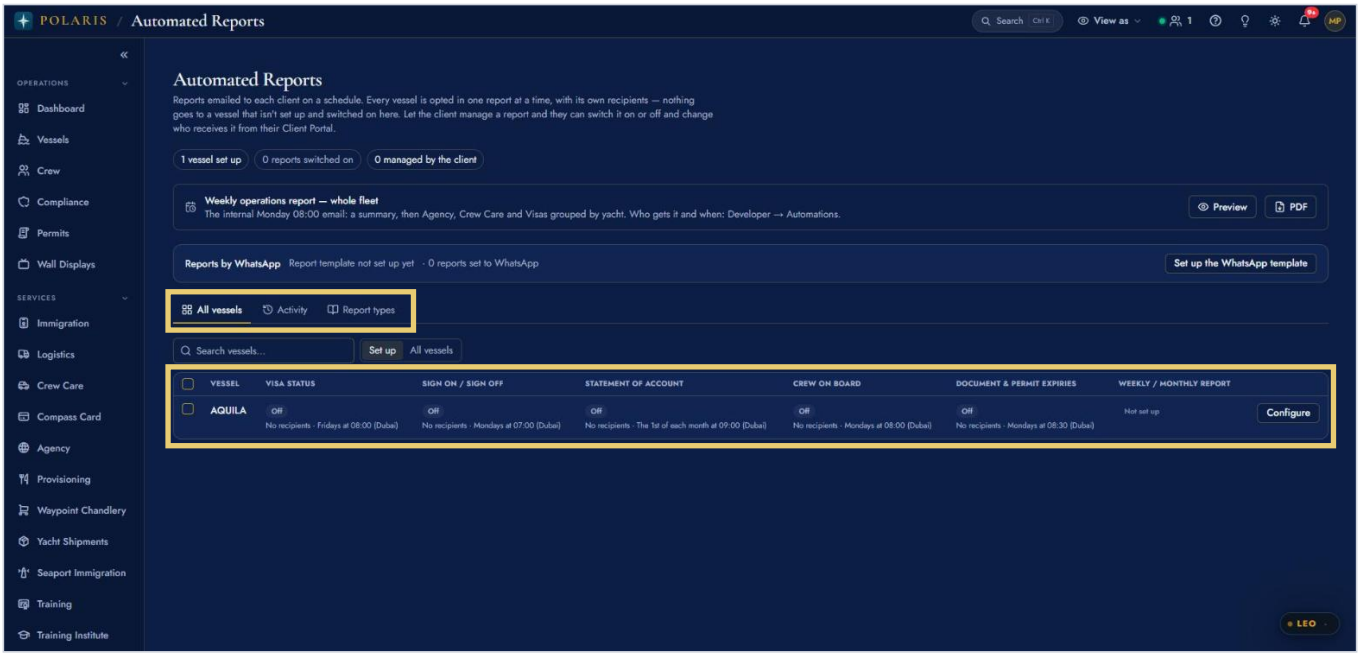

Schedule reports to a vessel

4 steps · about 4 min

Opt a vessel in to automatic emailed reports, choose who receives them and when.

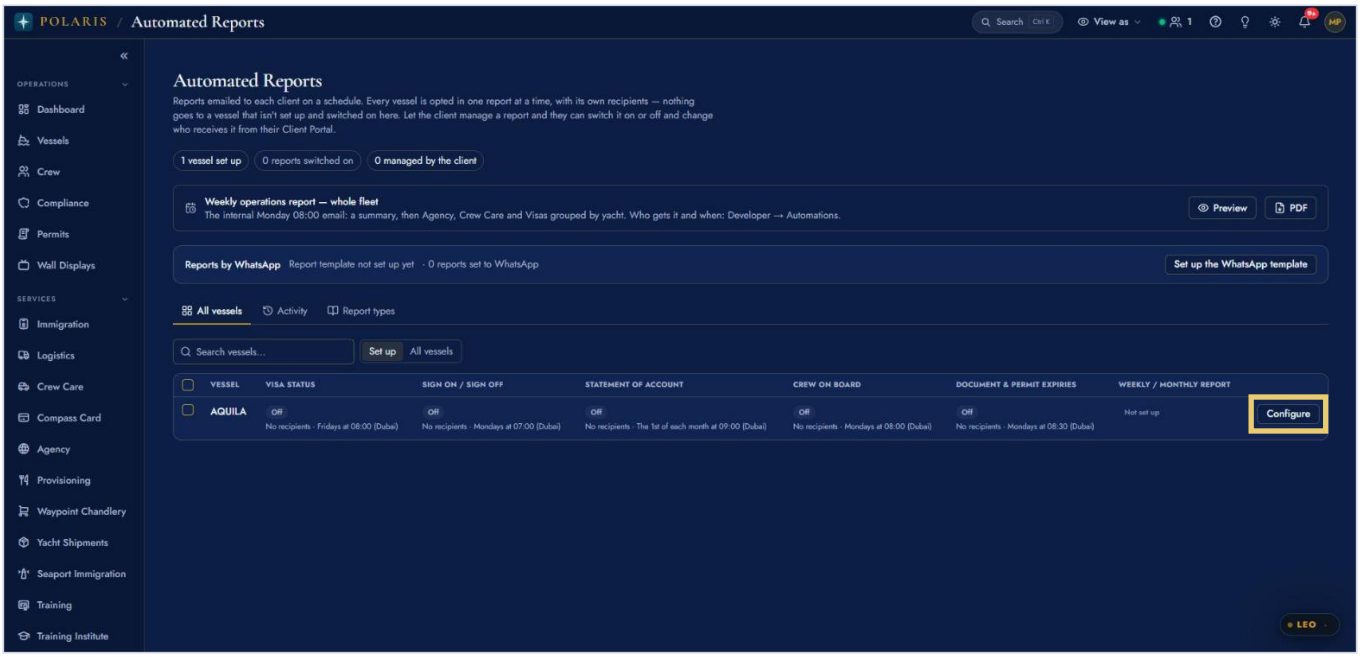

1 Open Automated Reports

Click **Automated Reports**. **All vessels** shows each vessel that's set up and whether each report — Visa status, Sign On / Sign Off, Statement of account, Crew on board, Document & permit expiries, Weekly / monthly — is on or off. Nothing goes to a vessel that isn't set up and switched on here.

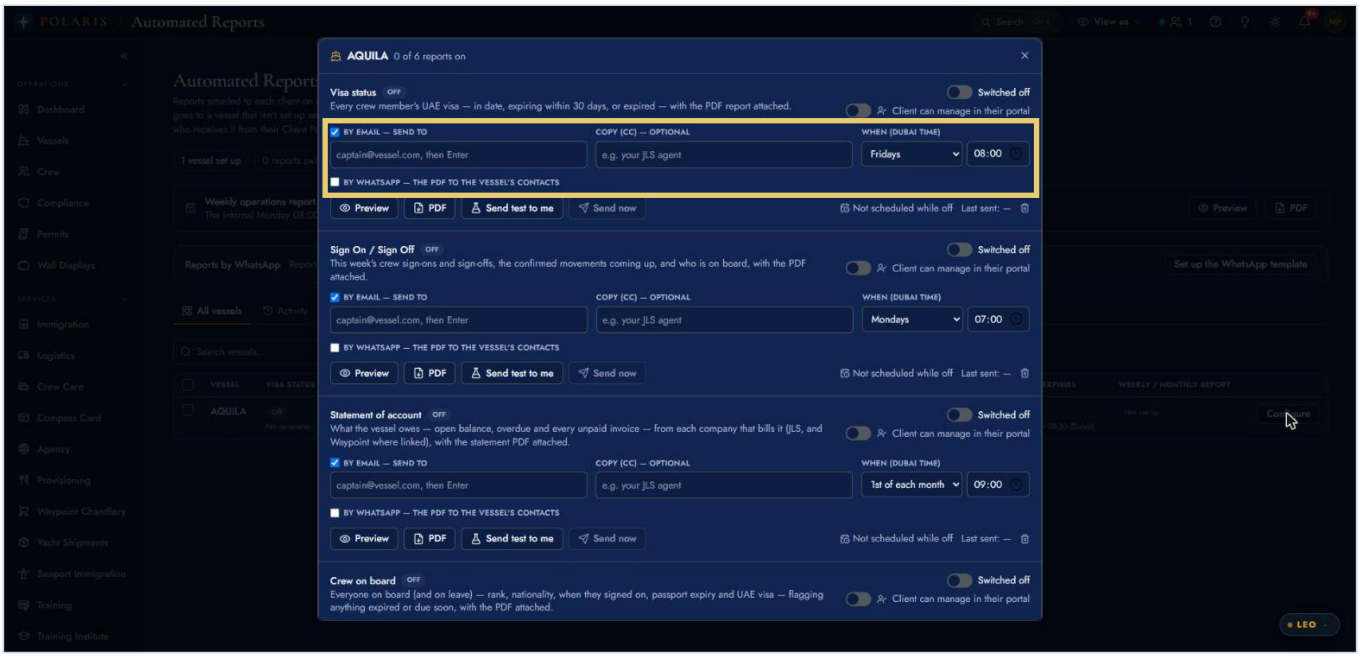

2 Set up a vessel

Switch to **All vessels** in the filter, find the vessel and click **Set up** (or **Configure** if it's already set up). To opt several at once, tick them and use **Opt in to …**.

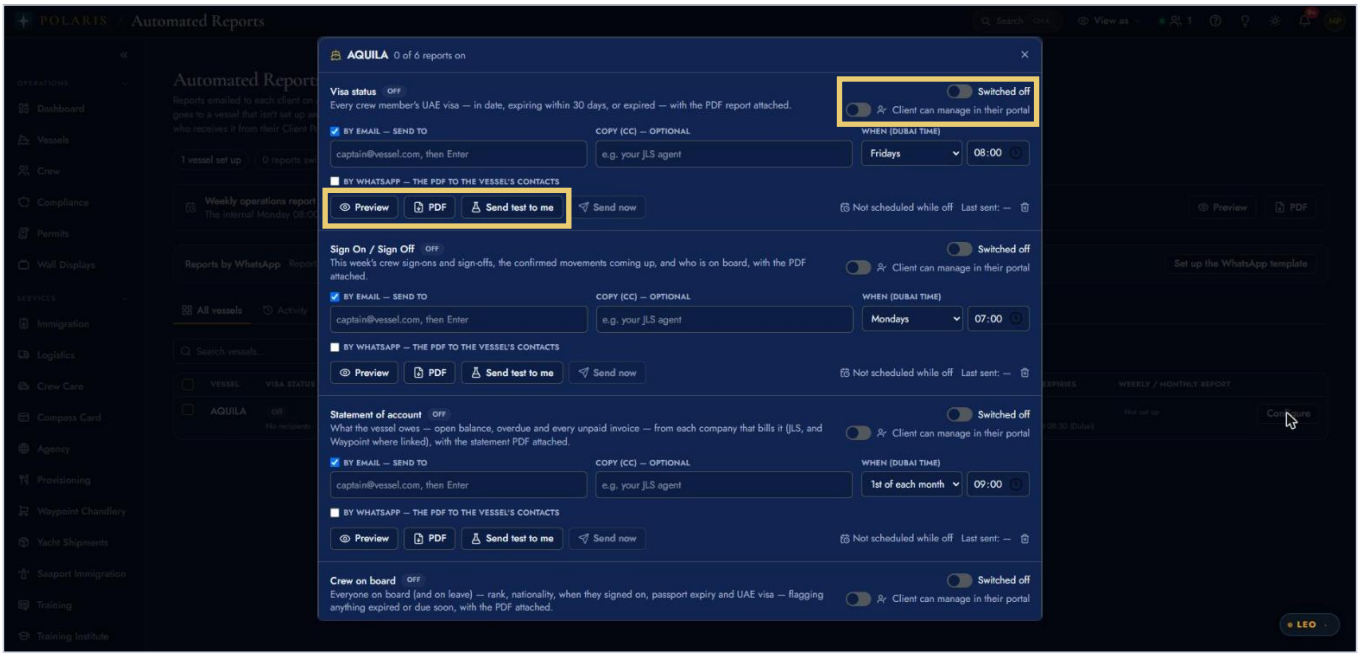

3 Choose recipients and timing

For each report, add the email addresses under **By email — send to** (press Enter after each), an optional **Copy (CC)**, and **When (Dubai time)** — day and time. Tick **By WhatsApp** to send the PDF to the vessel's WhatsApp contacts too.

4 Check it, then switch it on

Preview and **PDF** show what the report looks like; **Send test to me** emails it to you. When it's right, turn on **Switched off -> Sending**. **Client can manage in their portal** lets the captain change recipients themselves.

> **Tip:** Send now emails the client straight away, after a confirmation. The fleet-wide weekly operations report is set up separately, under Settings -> Automations.

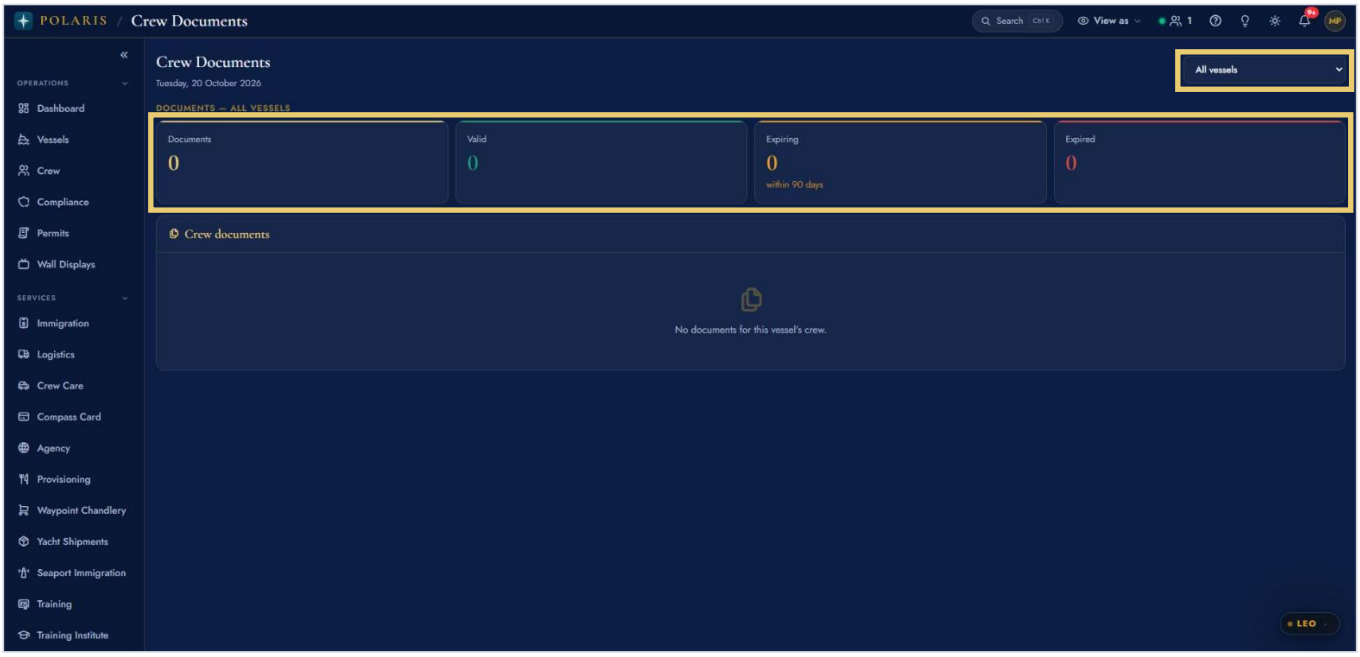

Check crew documents for expiry

1 steps · about 1 min

See which crew documents are valid, expiring within 90 days or expired, by vessel.

1 Open Crew Documents

Click **Crew Documents** and pick a vessel at the top right. The cards count documents that are **Valid**, **Expiring** (within 90 days) and **Expired**, and the list shows each crew member's document with its expiry date.

> **Tip:** Documents are added on each crew member's profile (Crew -> open the profile).

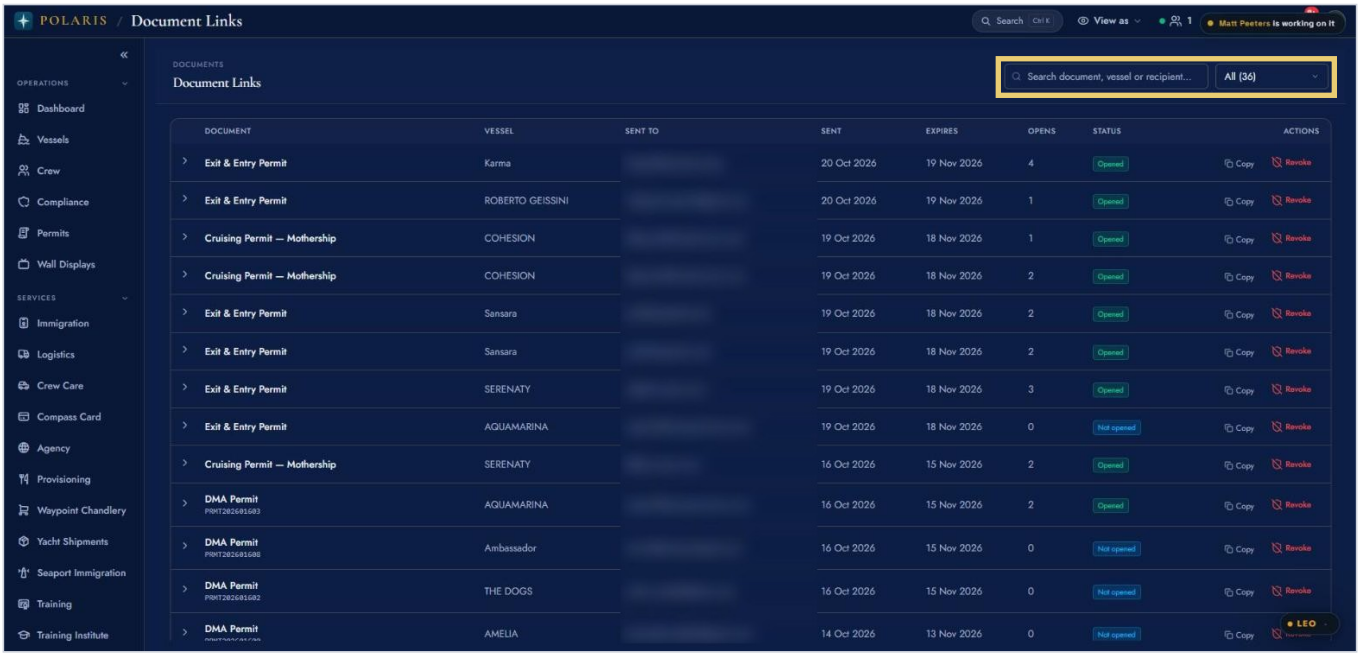

Track and revoke document links

3 steps · about 2 min

See every secure document link sent to clients, who opened it, and revoke one if needed.

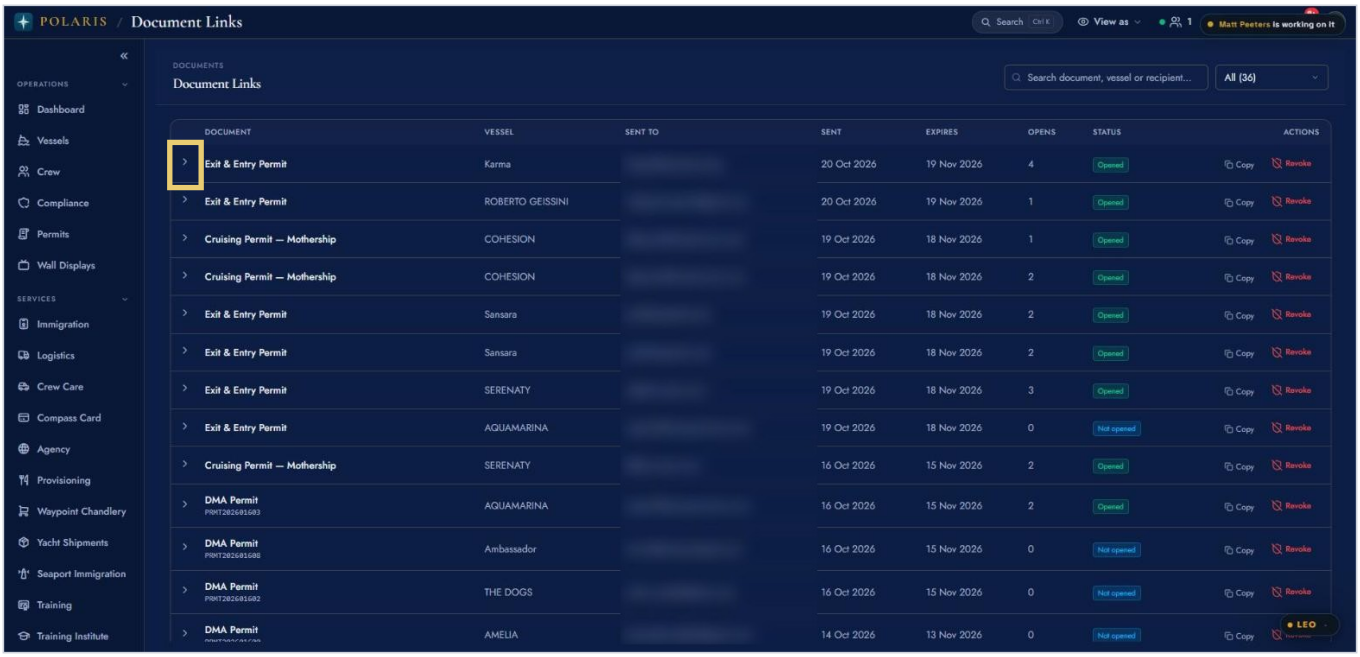

1 Open Document Links

Click **Document Links**. Every secure link sent to a client — permits, visas, reports — is listed with the vessel, recipient, sent and expiry dates, how many times it was opened and its status. Search, or filter by **Not opened**, **Opened**, **Expired** or **Revoked**.

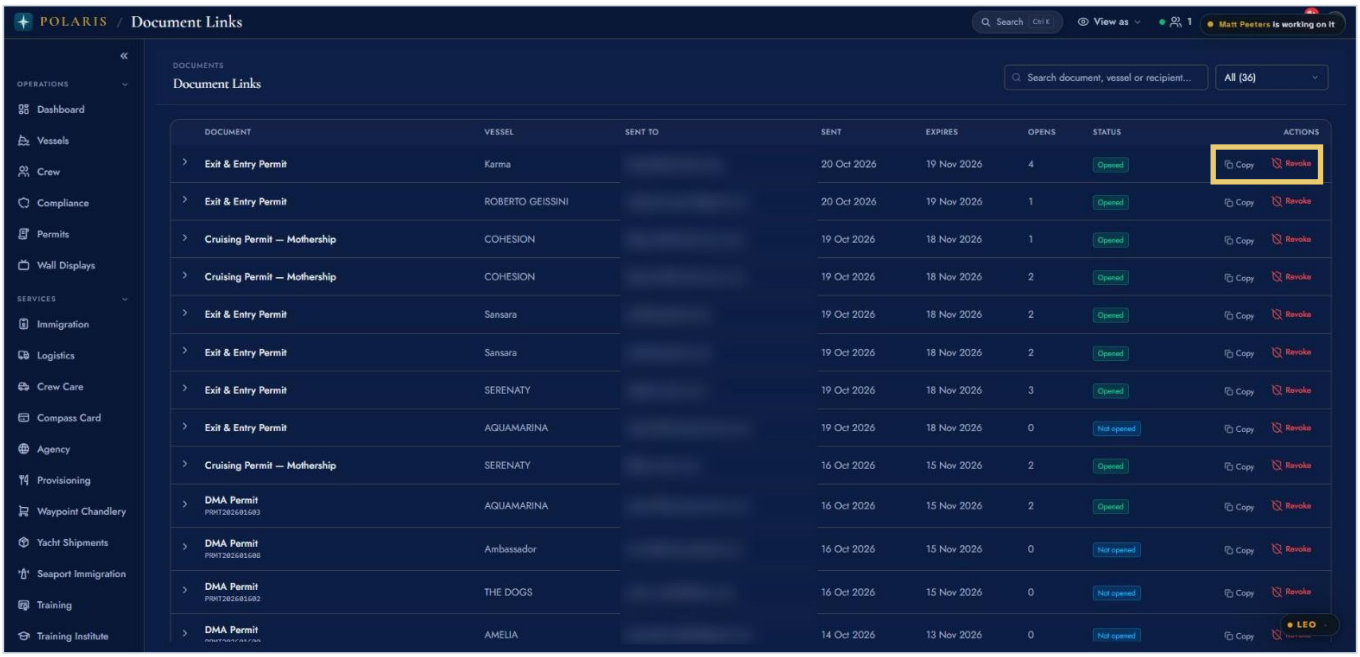

2 See who opened it

Click the arrow at the start of a row to see each time the link was viewed or downloaded, with the date and time.

3 Copy or revoke

Copy puts the link on your clipboard to resend. **Revoke** stops the link working (you'll be asked to confirm) — use it if a document went to the wrong person. A revoked link can be **Restored**.

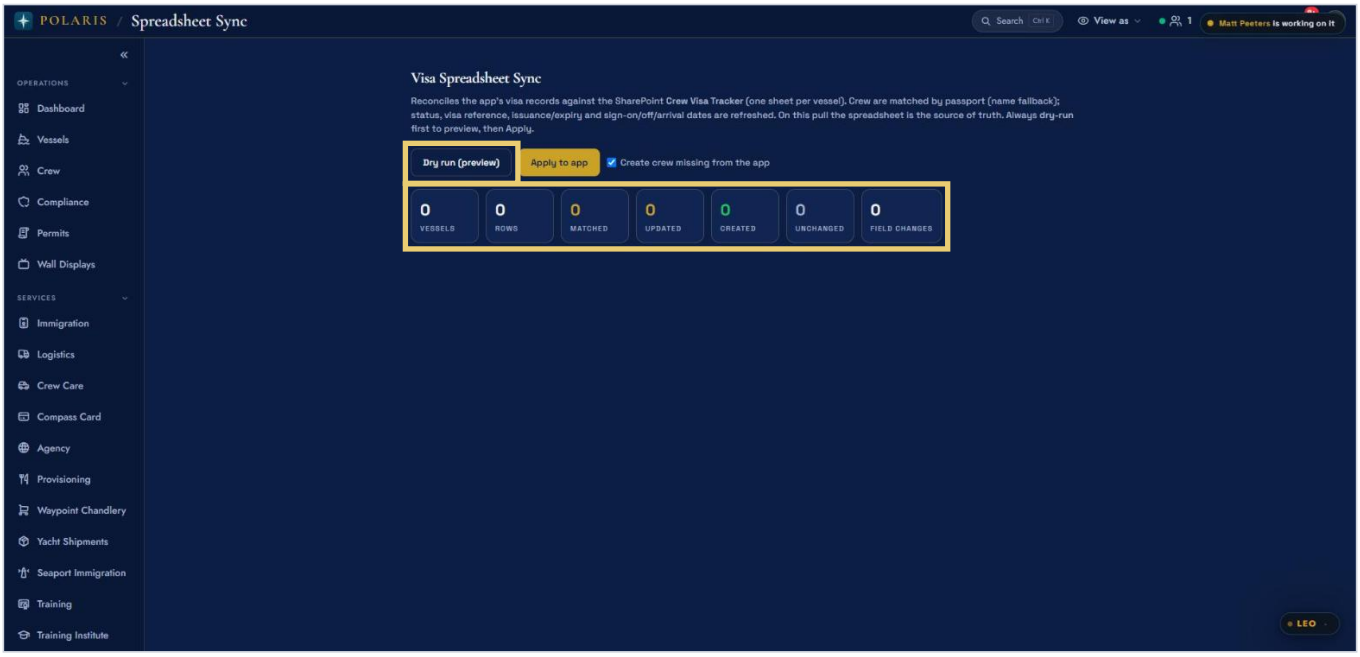

Sync visas from the Crew Visa Tracker

2 steps · about 2 min

Bring visa records in line with the SharePoint Crew Visa Tracker spreadsheet.

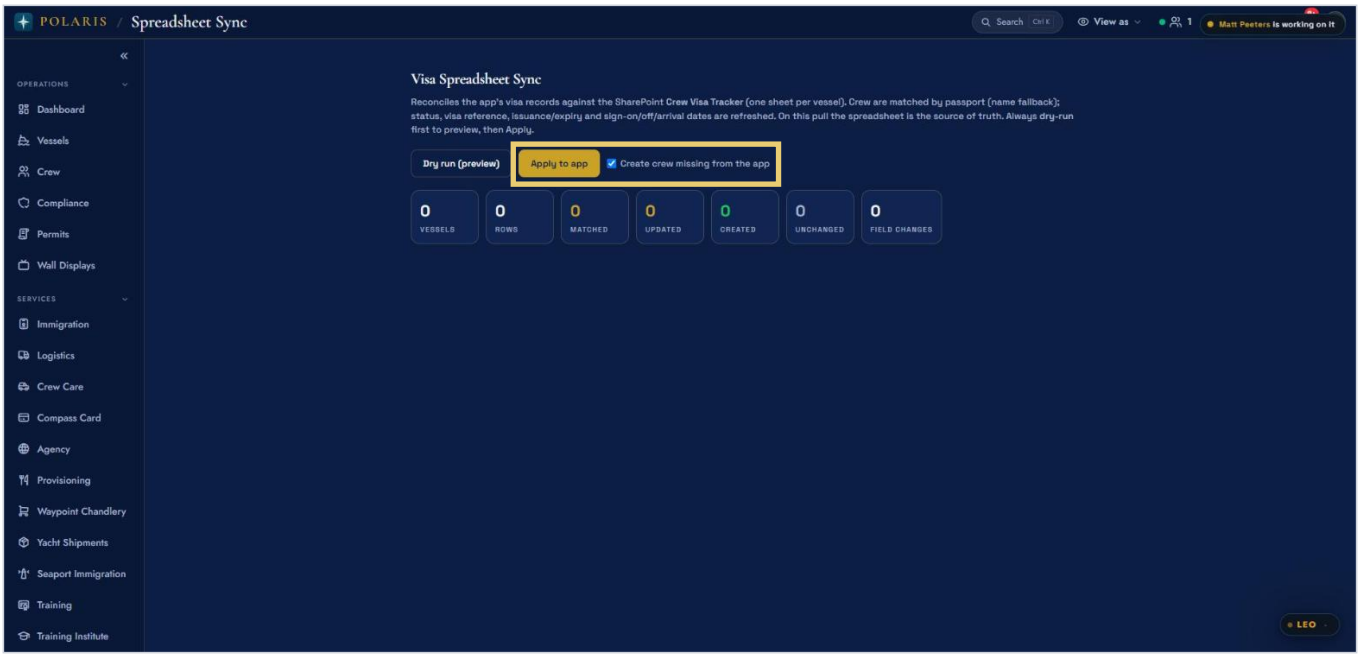

1 Run a dry run first

Click **Spreadsheet Sync**, then **Dry run (preview)**. Polaris reads every vessel's sheet in the SharePoint **Crew Visa Tracker** and shows what would change — vessels, rows, matched, updated, created and unchanged, with sample changes — without writing anything.

2 Apply

If the preview looks right, click **Apply to app** and confirm. Leave **Create crew missing from the app** ticked to add crew who are in the spreadsheet but not yet in Polaris.

> **Tip:** On this sync the spreadsheet wins — it overwrites visa statuses and dates in Polaris. Always dry-run first.

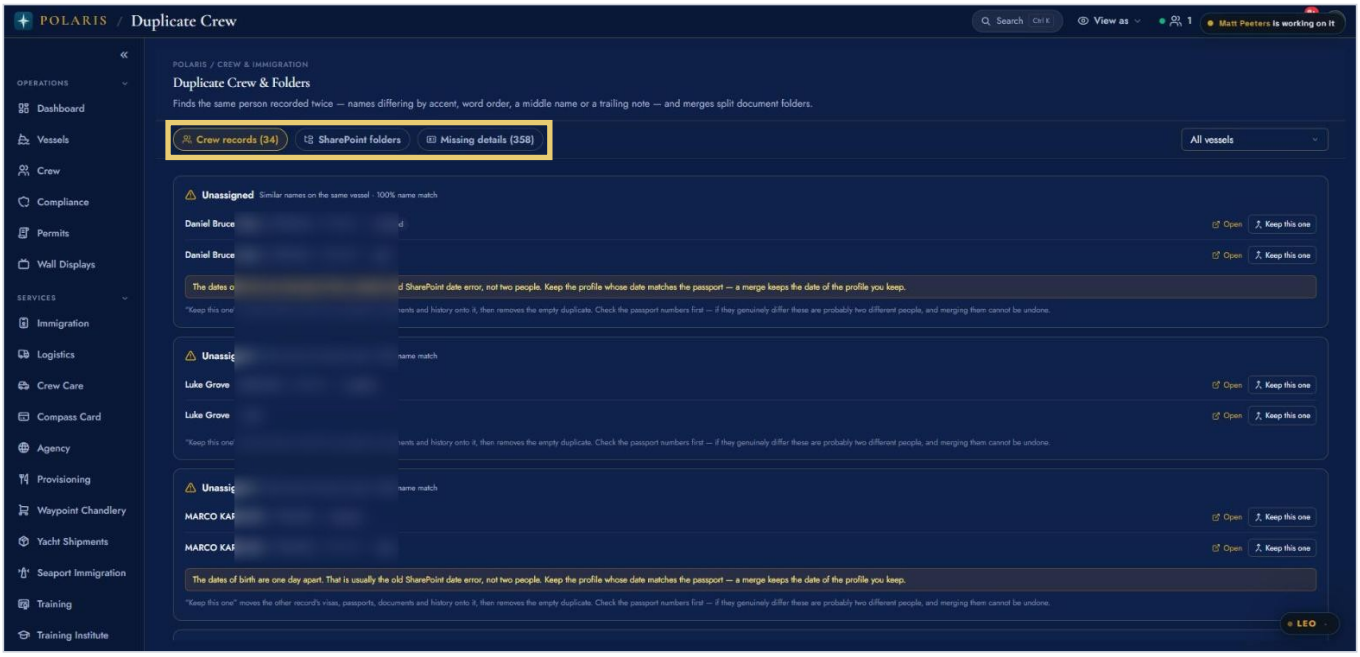

Merge duplicate crew records

3 steps · about 3 min

Find the same person recorded twice and merge them into one profile.

1 Open Duplicate Crew

Click **Duplicate Crew**. **Crew records** lists pairs that look like the same person — similar names on the same vessel, or the same passport number. **SharePoint folders** finds split document folders, and **Missing details** lists crew without a passport number or date of birth.

2 Check it's really the same person

Compare the dates of birth and passport numbers — click **Open** to see each full profile. Dates one day apart are usually an old spreadsheet error rather than two people.

3 Keep one and merge

Click **Keep this one** on the record to keep. The dialog shows how many visas, passports, documents and events will move across. Click **Merge records** to move them and remove the empty duplicate.

> **Tip:** Merging can't be undone. If the passport numbers genuinely differ, they're probably two different people — leave them.
