Add a new permit

5 steps · about 4 min

Record a gate pass, navigation licence or any other permit and email it to the yacht.

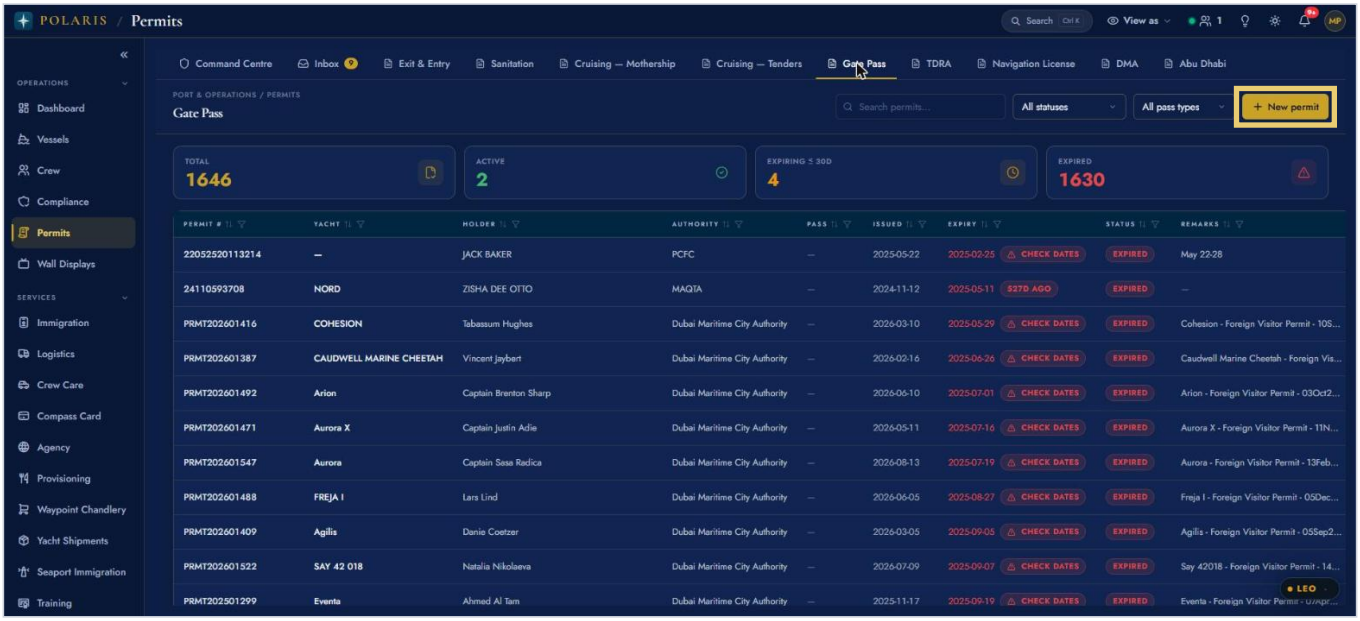

1 Open the permit type's tab

In **Permits**, click the tab for the kind of permit — for example **Gate Pass** or **Navigation License**. Each tab lists that type with Total, Active, Expiring and Expired counts.

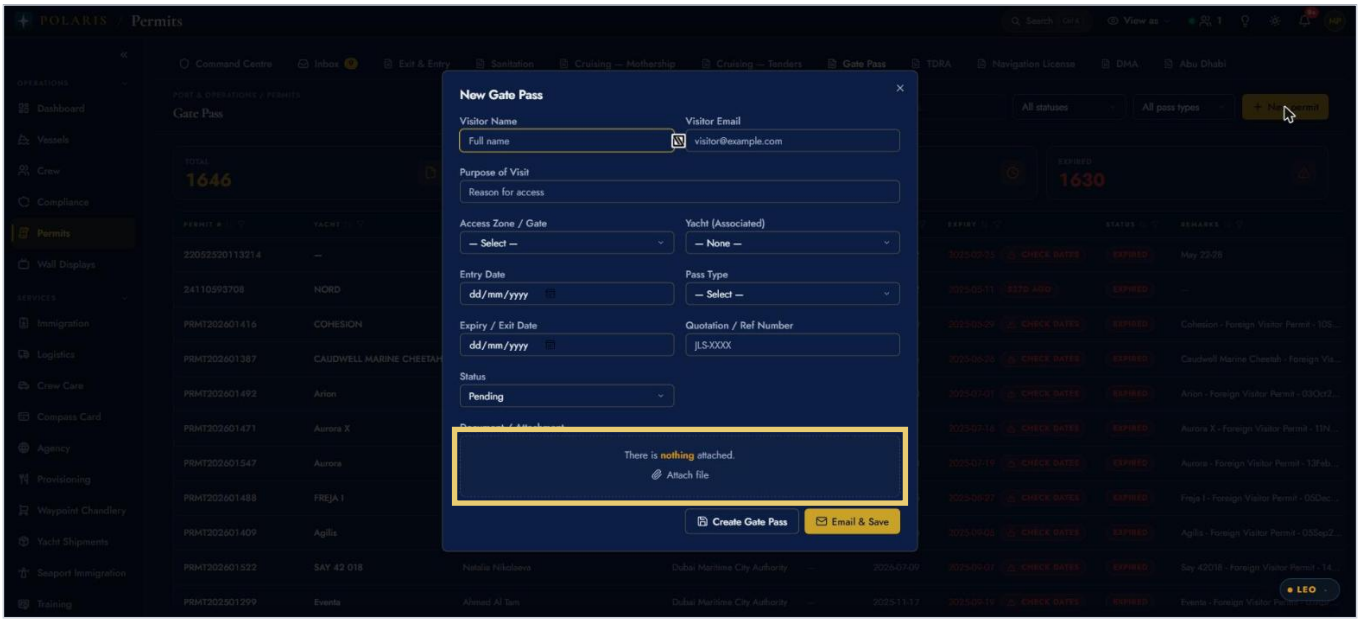

2 Click New permit

Click **New permit** at the top right. Each permit type has its own form with the fields that permit needs.

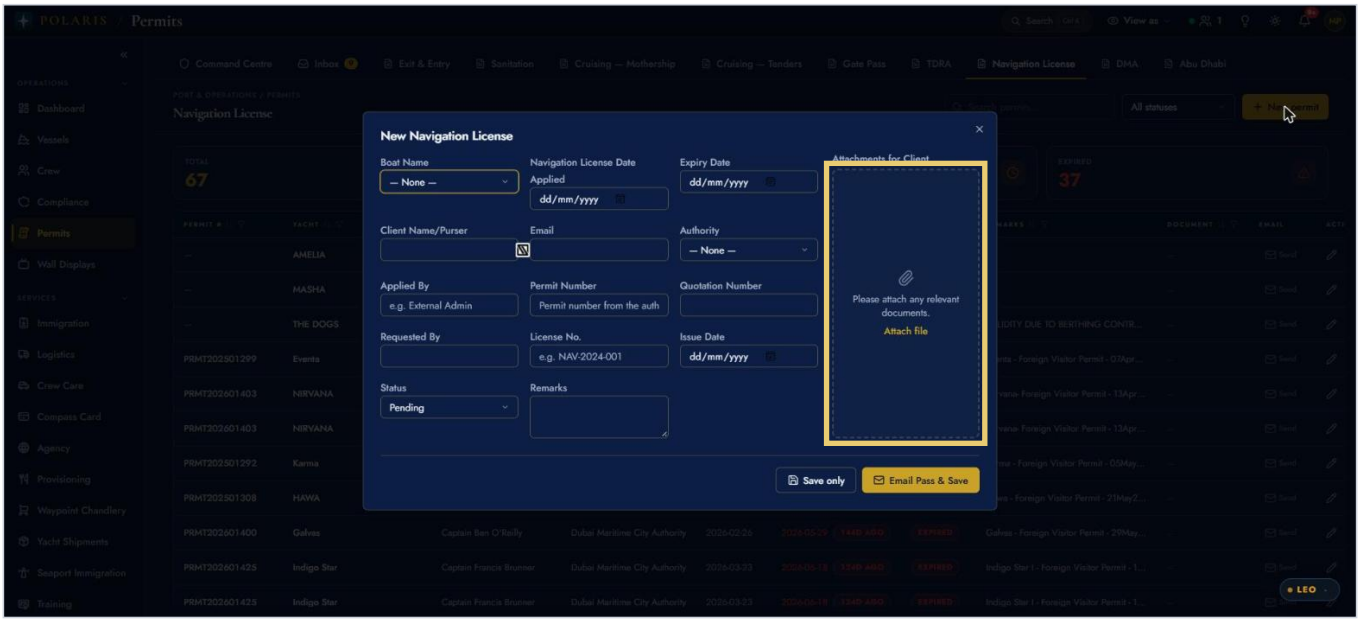

3 Example — Gate Pass

Enter the **Visitor Name** and **Visitor Email**, the **Purpose of Visit**, the **Access Zone / Gate**, the associated **Yacht**, the **Entry Date** and **Expiry / Exit Date**, the **Pass Type**, the **Quotation / Ref Number** and the **Status**. Use **Attach file** to add the pass itself.

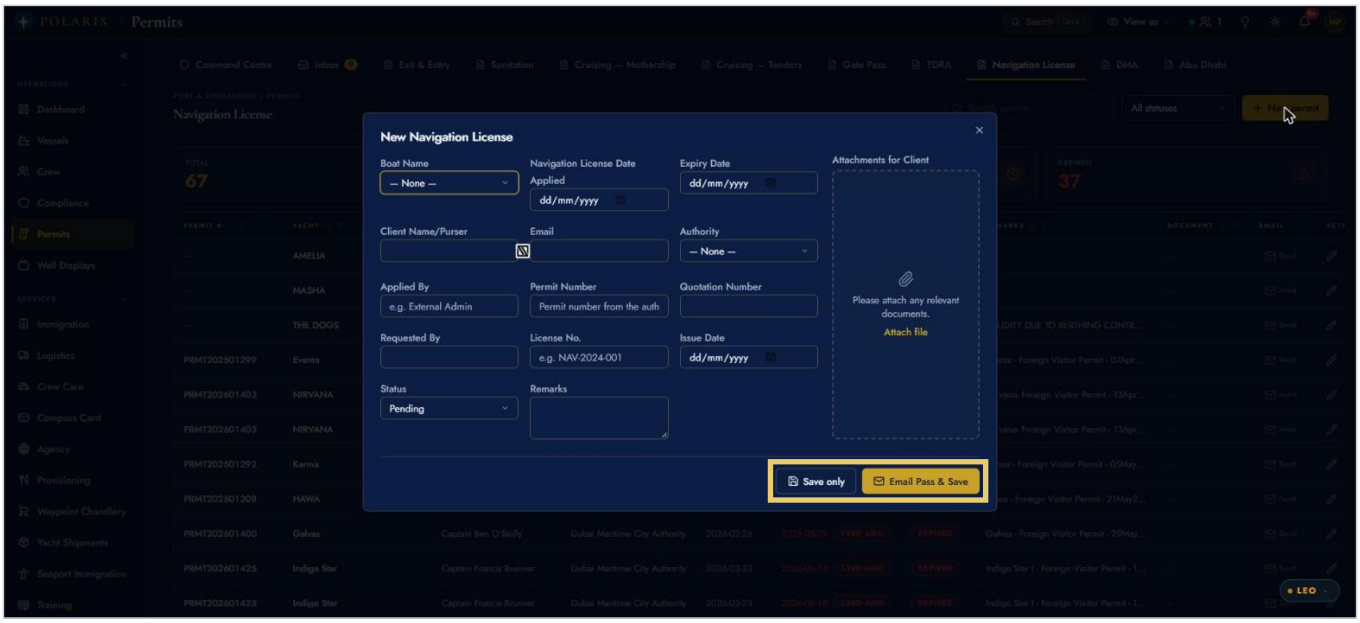

4 Example — Navigation License

Choose the **Boat Name**, then fill in the dates, **Client Name/Purser**, **Email**, **Authority**, **Permit Number**, **License No.** and **Status**. Drop the licence and any supporting documents into **Attachments for Client**.

5 Save, or email and save

Click **Save only** / **Create Gate Pass** to record the permit, or **Email Pass & Save** / **Email & Save** to also email it, with its attachments, to the client.

> **Tip:** Set the Expiry Date — permits without one show under "No Expiry Set" and get no reminders.
