POLARIS · HOW-TO GUIDE · SERVICES

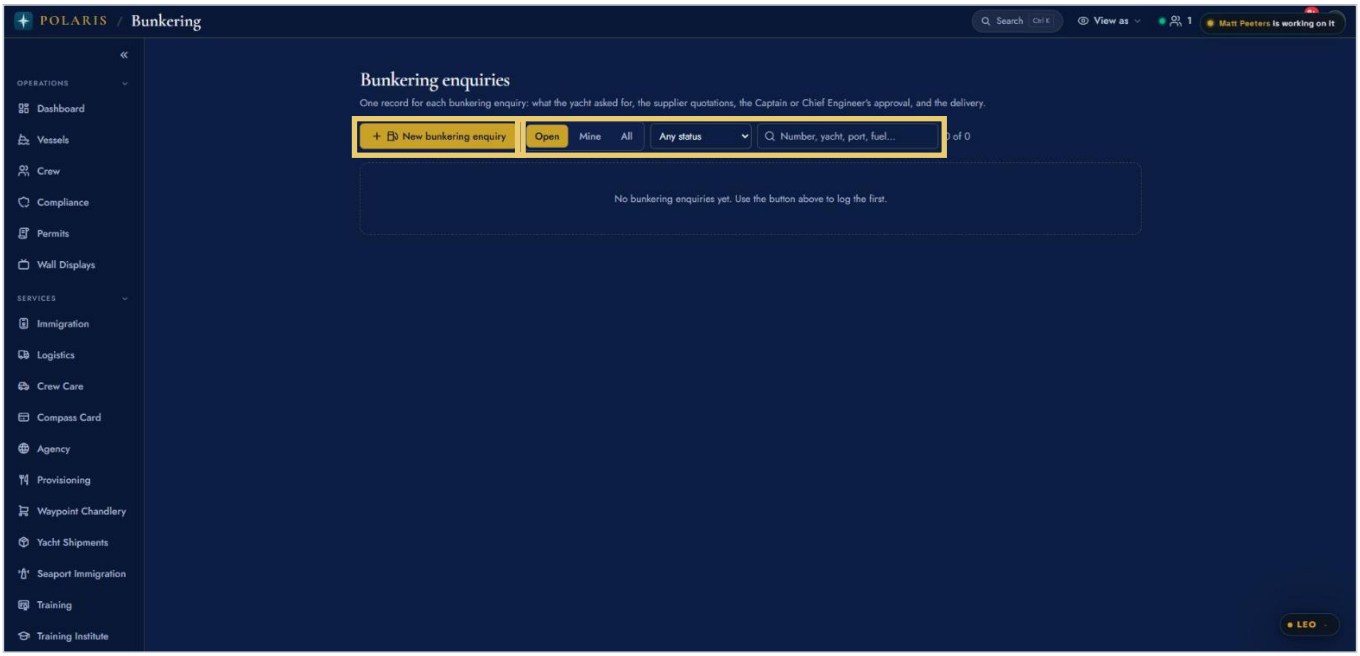

Log and manage a bunkering enquiry

4 steps · about 4 min

Record a yacht's fuel request, get supplier quotes, the vessel's approval and the delivery.

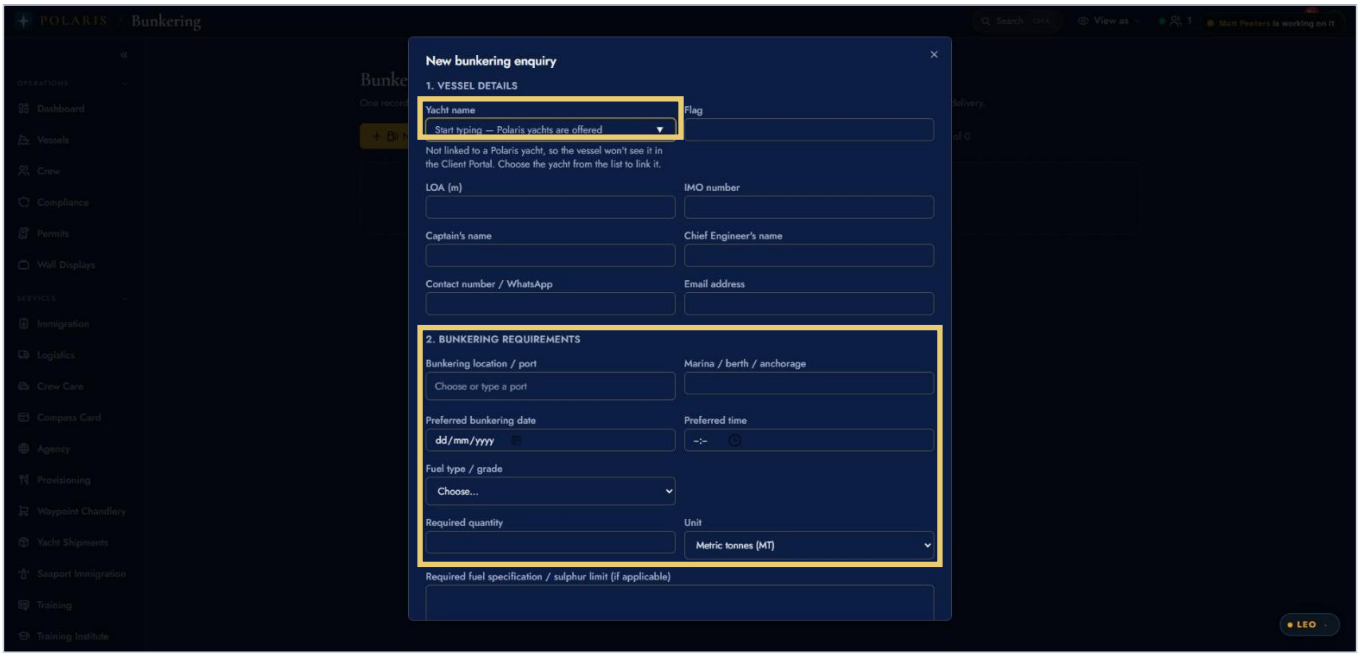

1 Click New bunkering enquiry

Click **Bunkering**, then **New bunkering enquiry**. Use **Open / Mine / All**, the status filter and search to find existing enquiries.

2 Vessel and fuel details

Under **Vessel details**, start typing the **Yacht name** and choose it from the list so the vessel sees it in their Client Portal. Add the captain or chief engineer and a phone or email. Under **Bunkering requirements** give the port, preferred date, **Fuel type / grade**, quantity and unit — these are required.

3 Delivery and confirmation

Add the delivery method, fuel remaining and tank capacity, and whether the yacht sails out of the UAE afterwards (this decides VAT).The **Vessel's confirmation** can be signed now or recorded later — the enquiry can't go to suppliers until it is. Click **Log the enquiry**; the Agency team is emailed.

4 Quotes, approval and delivery

Open the enquiry and move it along: **Enquiries sent to suppliers**, **Add a quotation**, **Sent to the vessel to approve**, **Approve** (record who approved), then **Mark delivered**. The pre-filled declaration and Bunker Delivery Note open as PDFs.

> **Tip:** Status changes and comments on an enquiry are emailed to the team.
